

Survey on the environmental situation at the HNEE

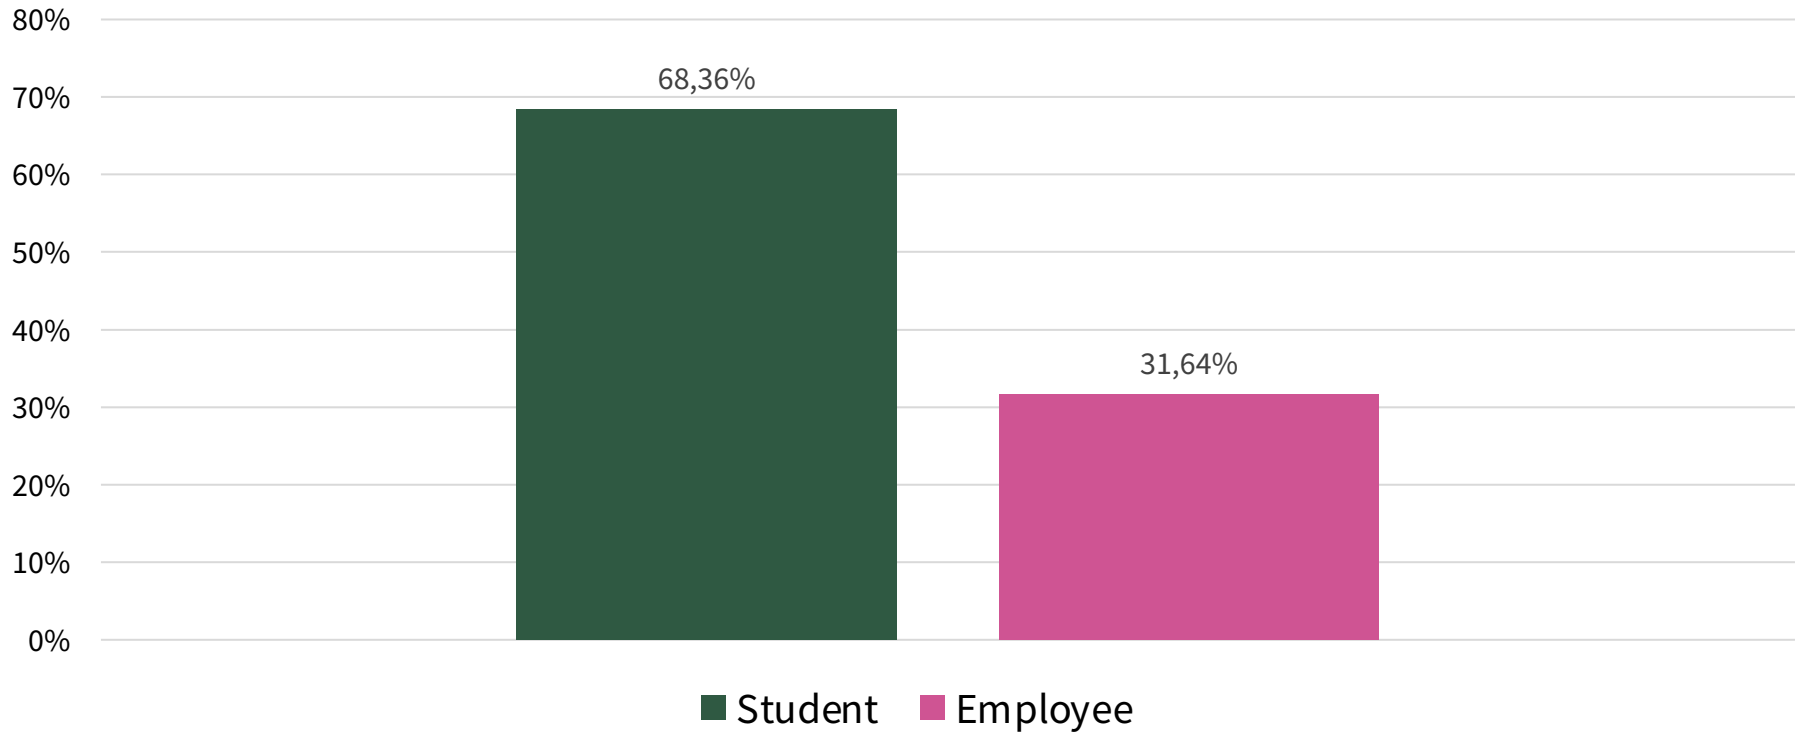

2021

The results of this survey were significantly influenced by the
pandemic event

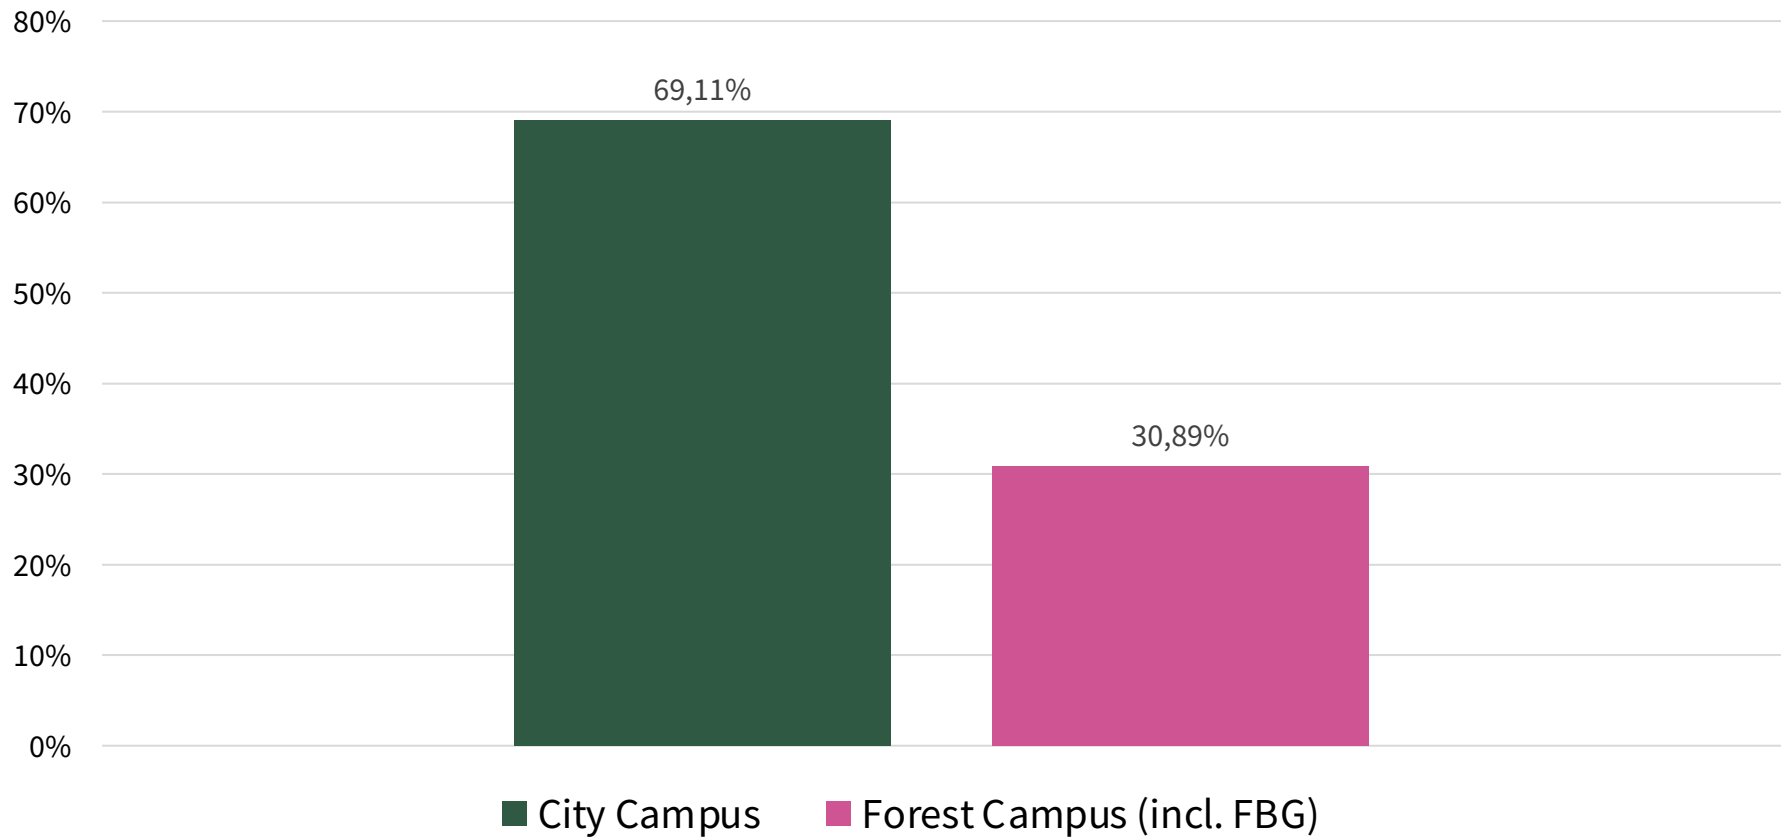

1. General information:

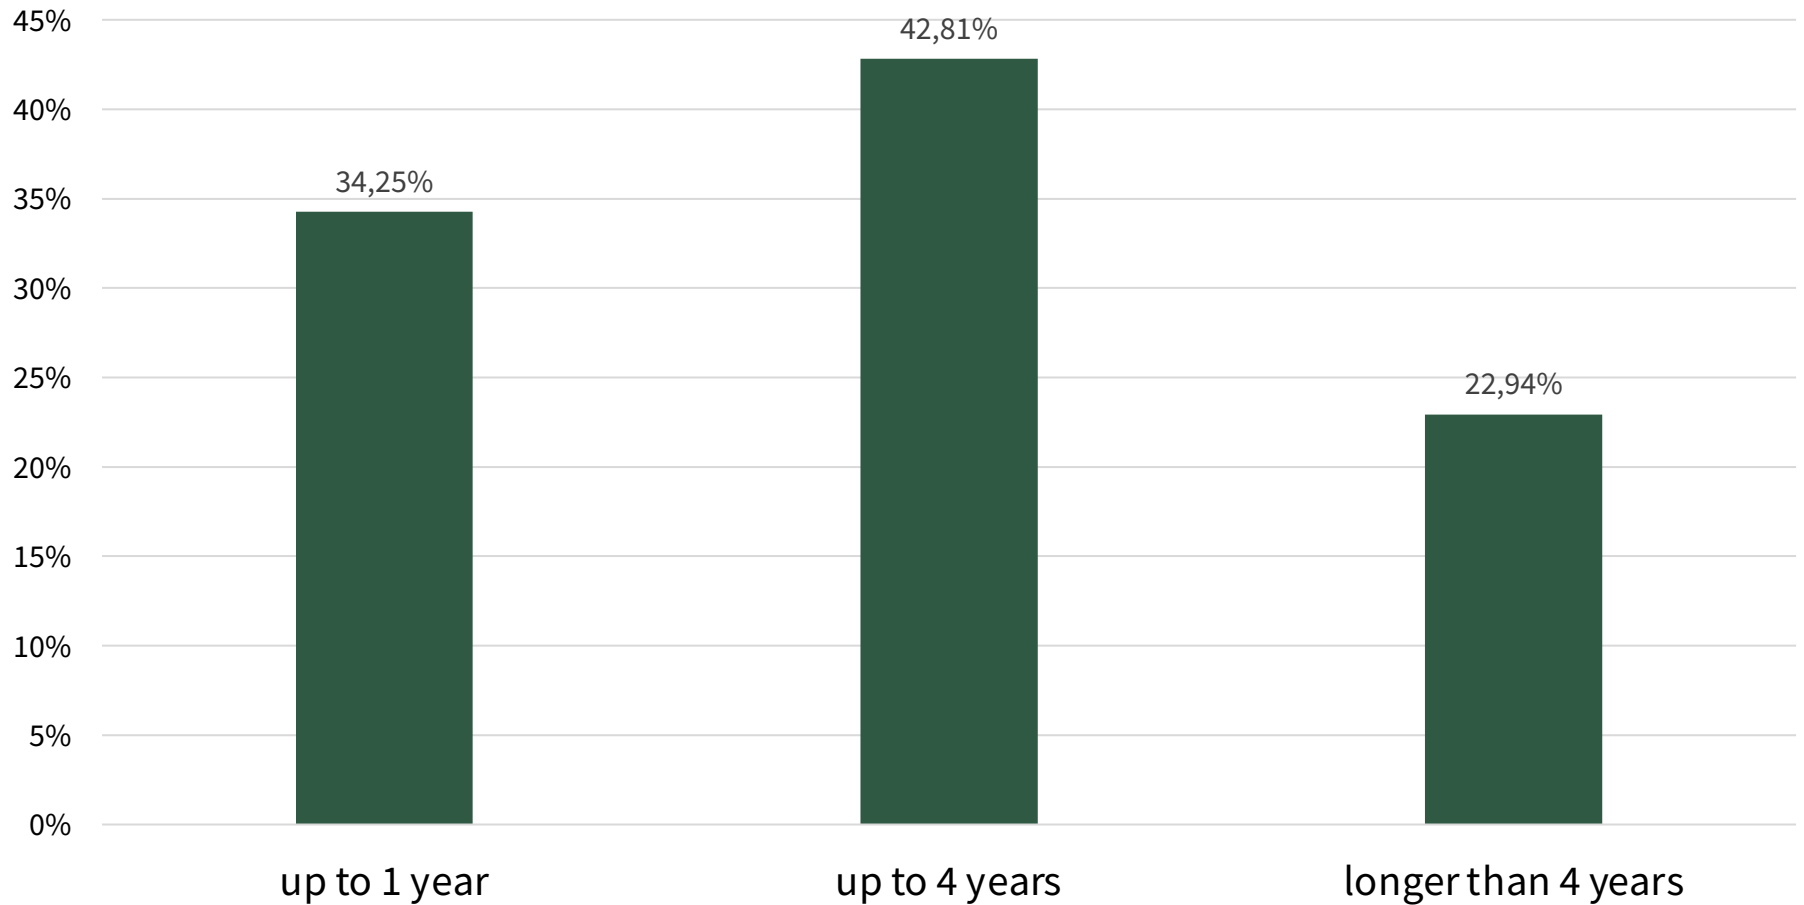

a) What is your status at HNEE?

b) At which HNEE location do you spend most of your time?

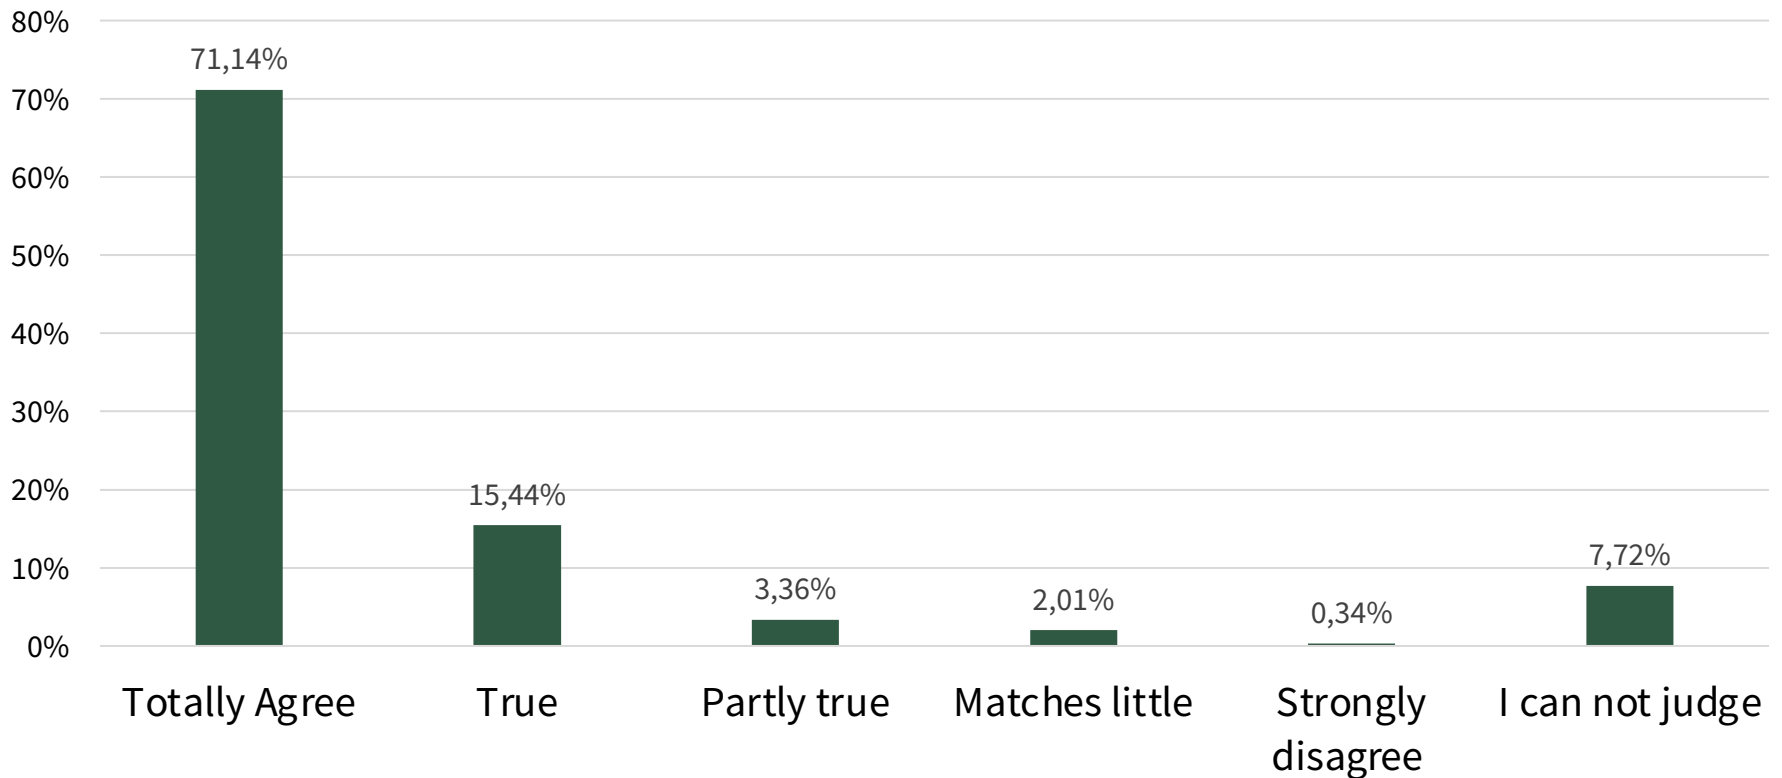

c) How long have you been at HNEE?

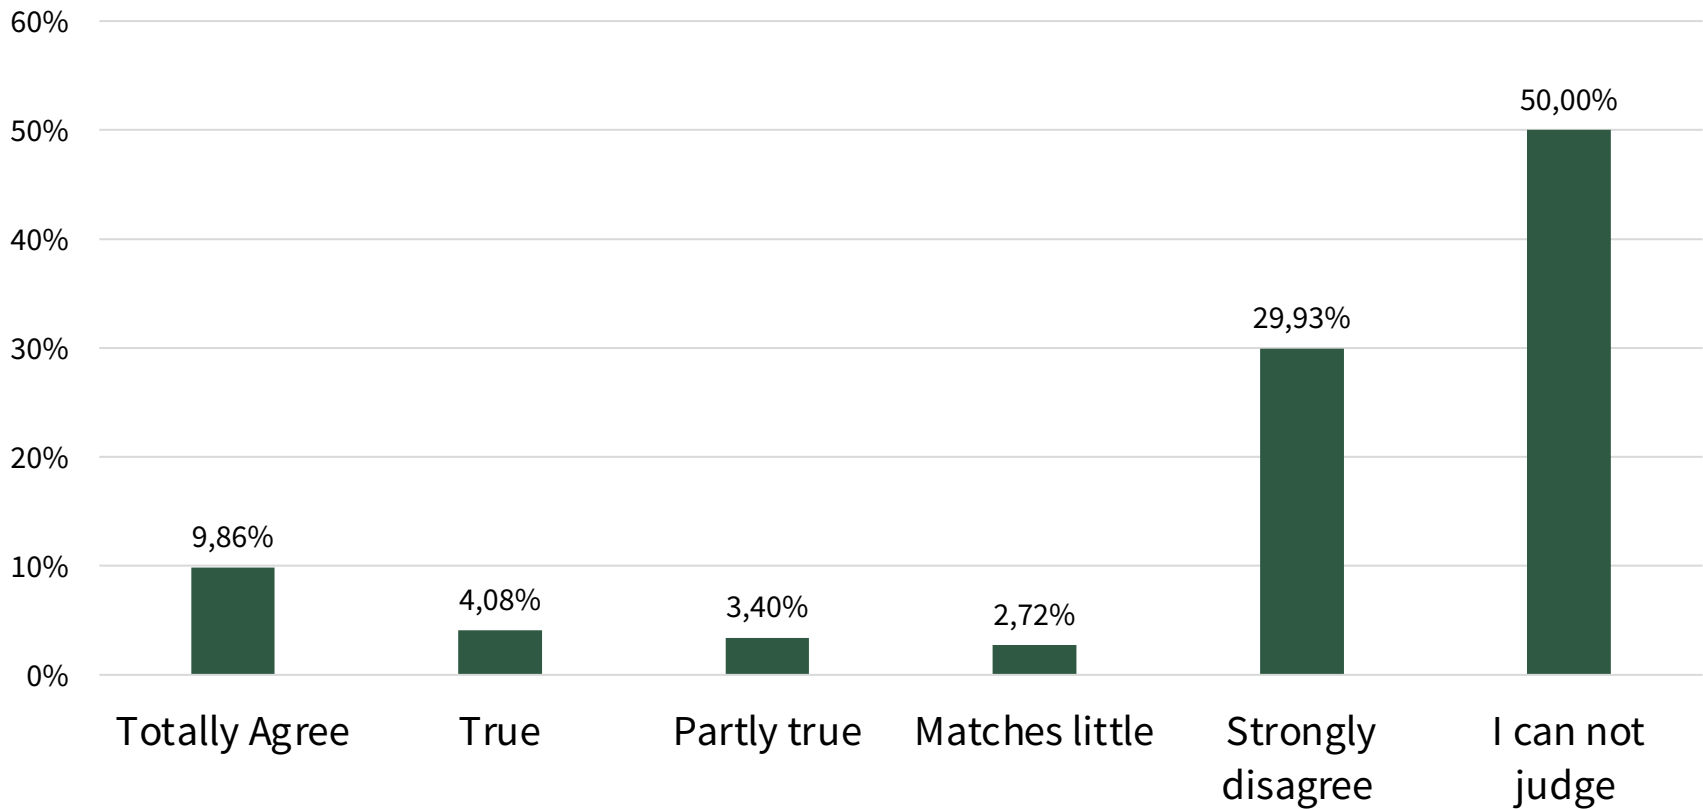

2. Waste disposal:

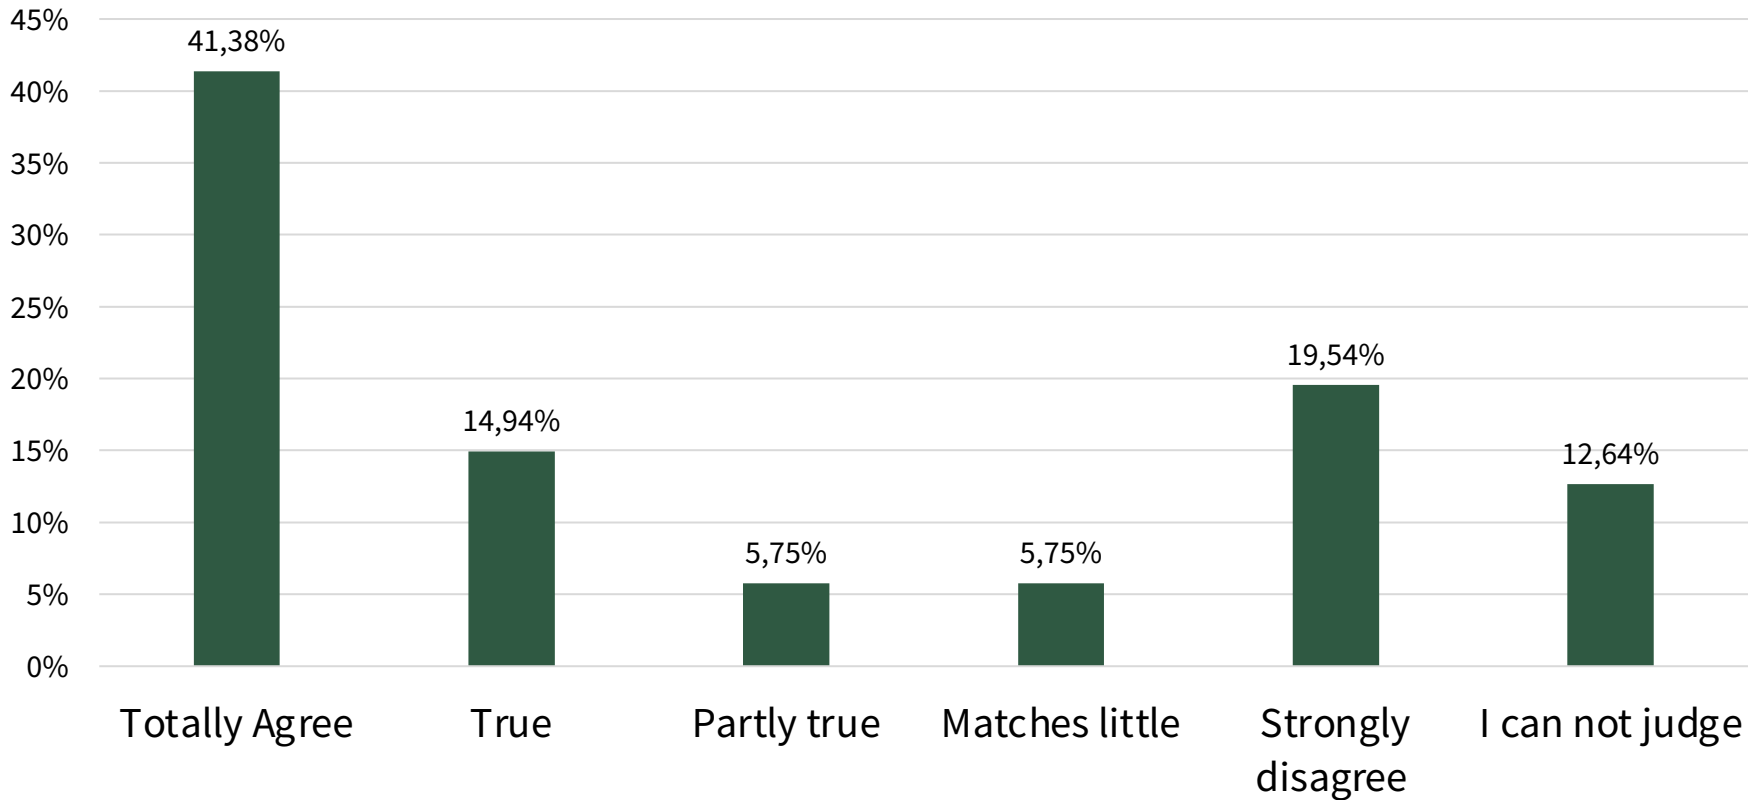

I use the 3-way waste containers (paper, residual waste, recyclables)

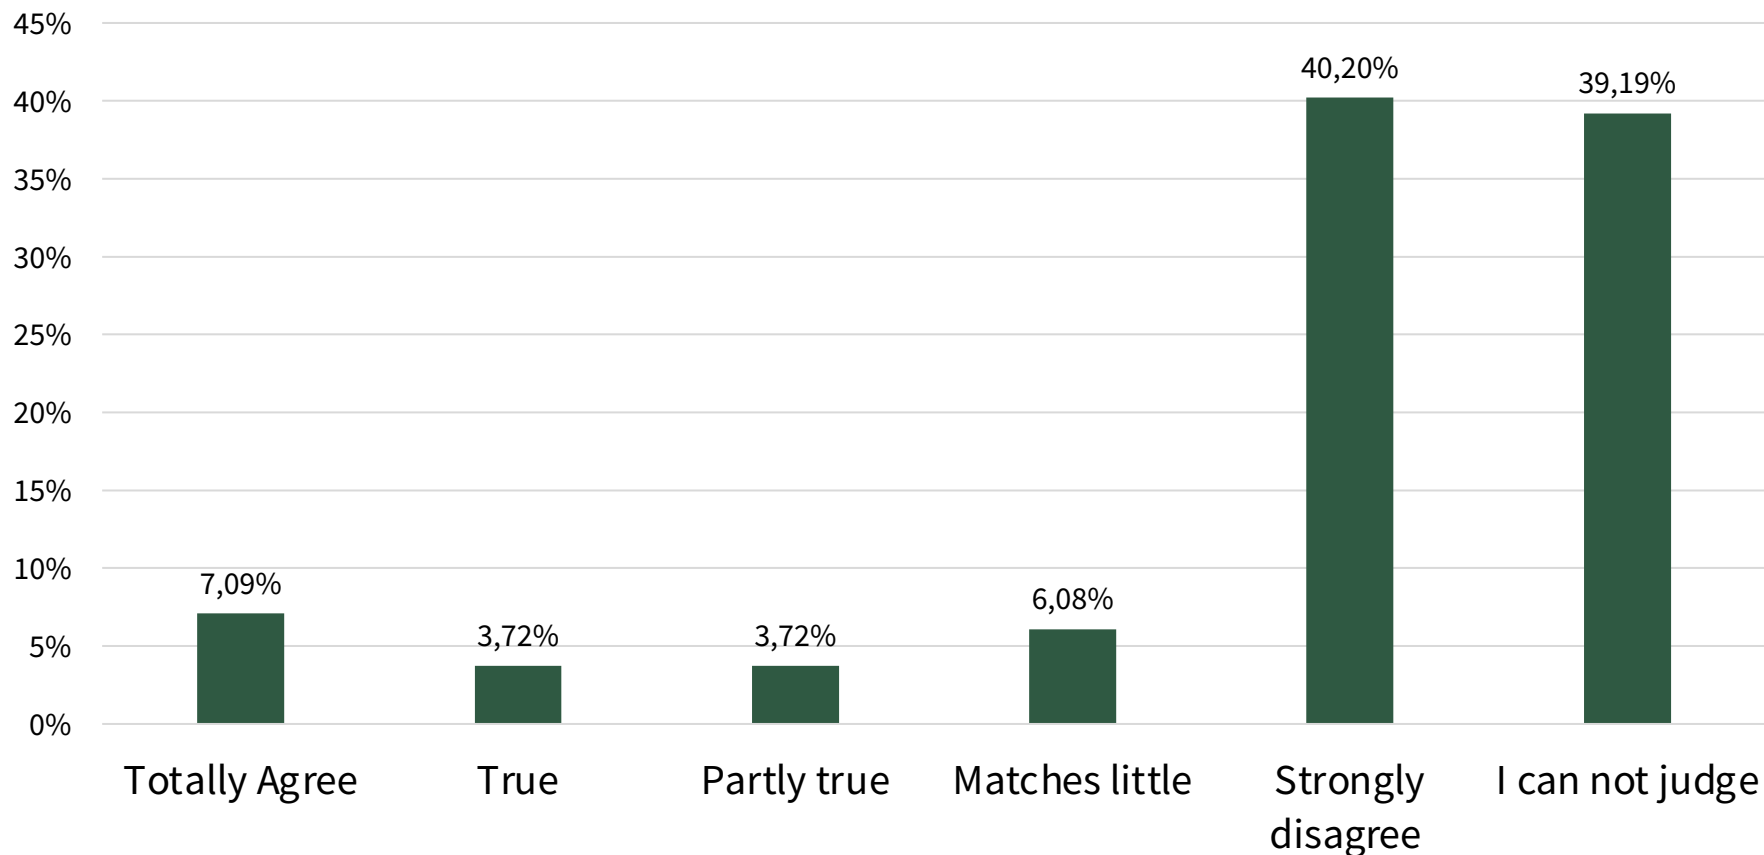

I dispose glass in the glass container on the campus (behind house 2, 3 and 16)

For employees: I know that I can hand over office furniture that I no longer need to the Property and Environmental Management Department for further use or disposal.

I dispose of bio-waste generated at the university in the bio-waste garbage can at the city campus behind house 2.

Comments about waste:

(selection of the most frequent answers)

Disposal options (glass and organic waste) unknown so far

Use of the biowaste garbage can is too cumbersome

Biowaste garbage can also at the Waldcampus would be desirable

Participants would like more information about waste system (what belongs where and where is the disposal point for it, for example in the 1st semester, see-through, emails or signs)

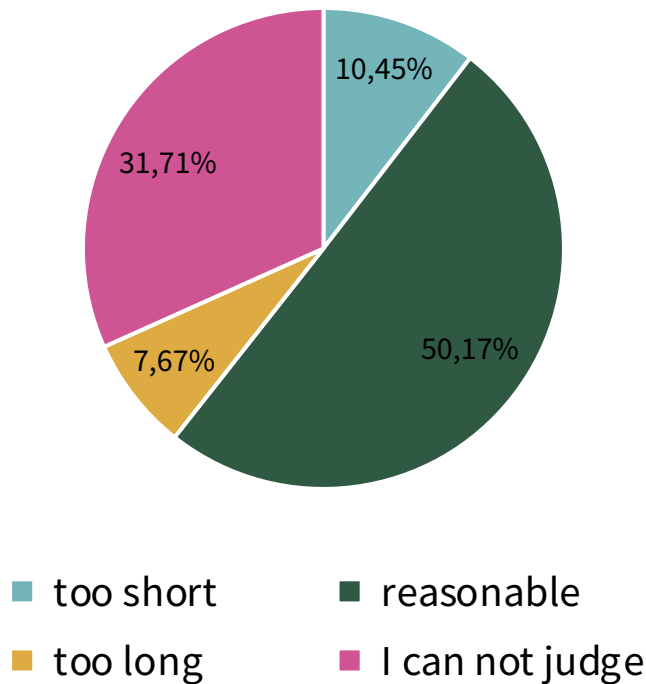

The bio garbage can is often full and is emptied too infrequently

Plastic bags in paper waste garbage cans in the offices are

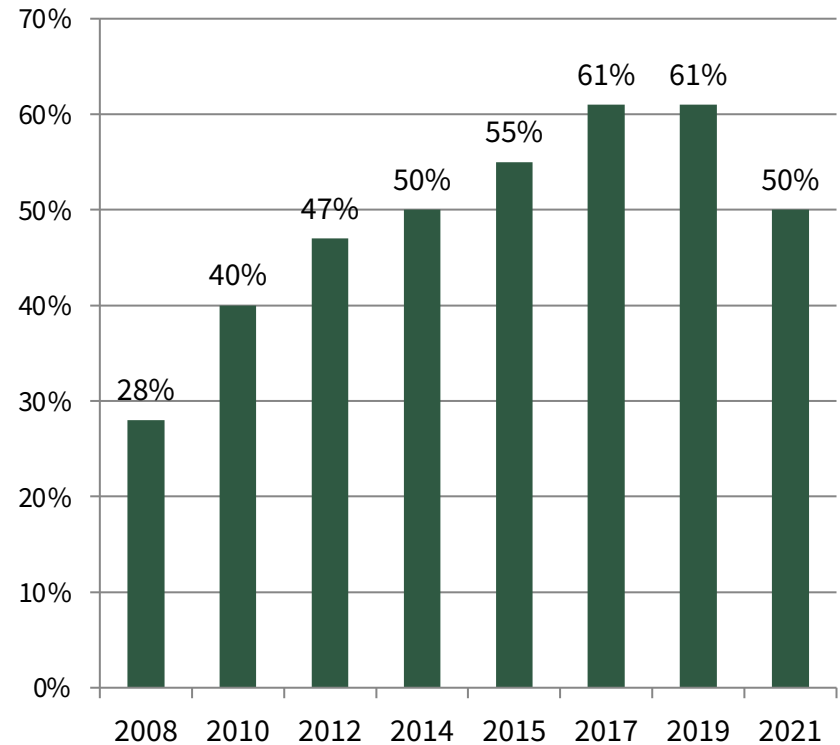

3. Water usage:

I find the set time interval of the taps appropriate, if there is one.

The set time intervals of the taps are appropriate

Comments on the use of electricity:

(selection of the most frequent answers)

Electricity is wasted in outdoor lighting

Further conversion to energy-saving light sources would be desirable

Some areas are unnecessarily lit during the day

The mensa is unnecessarily lit at night

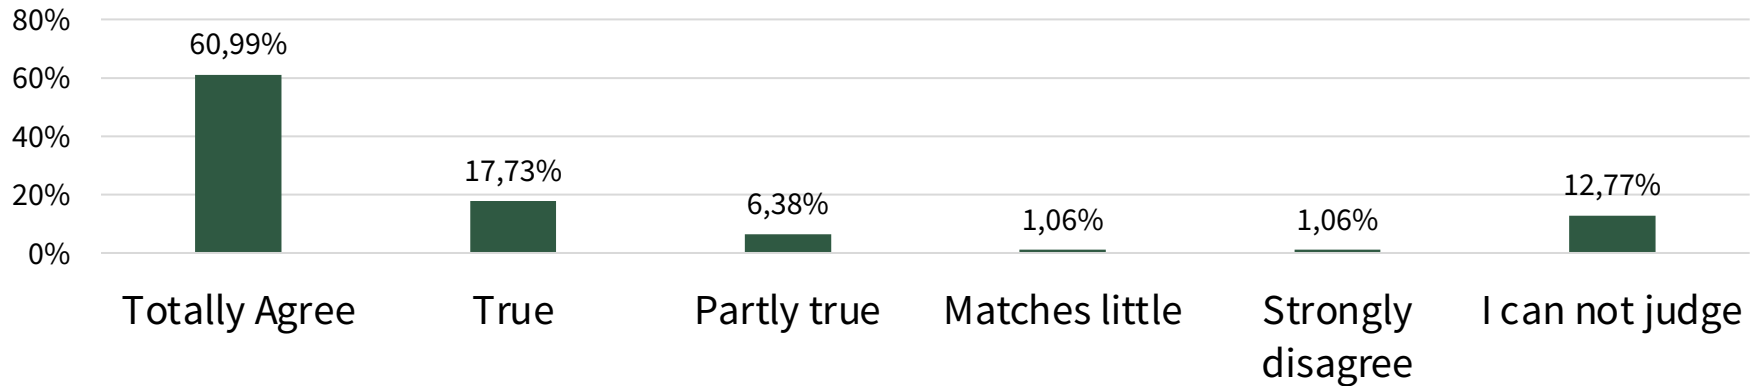

Switchable power strips are not available in all offices

Projectors are not consistently switched off in the lecture halls

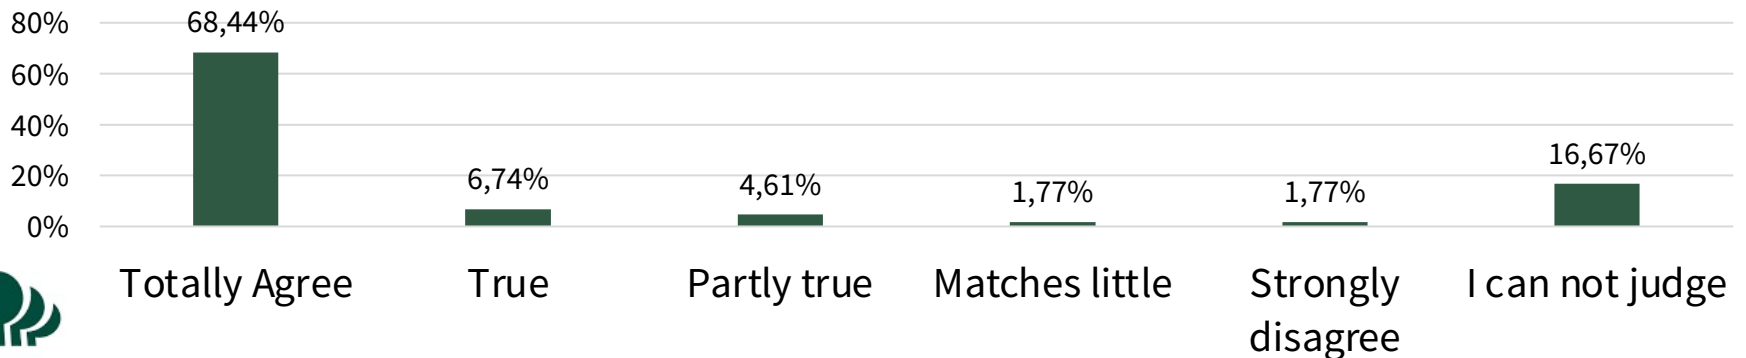

4. Use of energy (electricity):

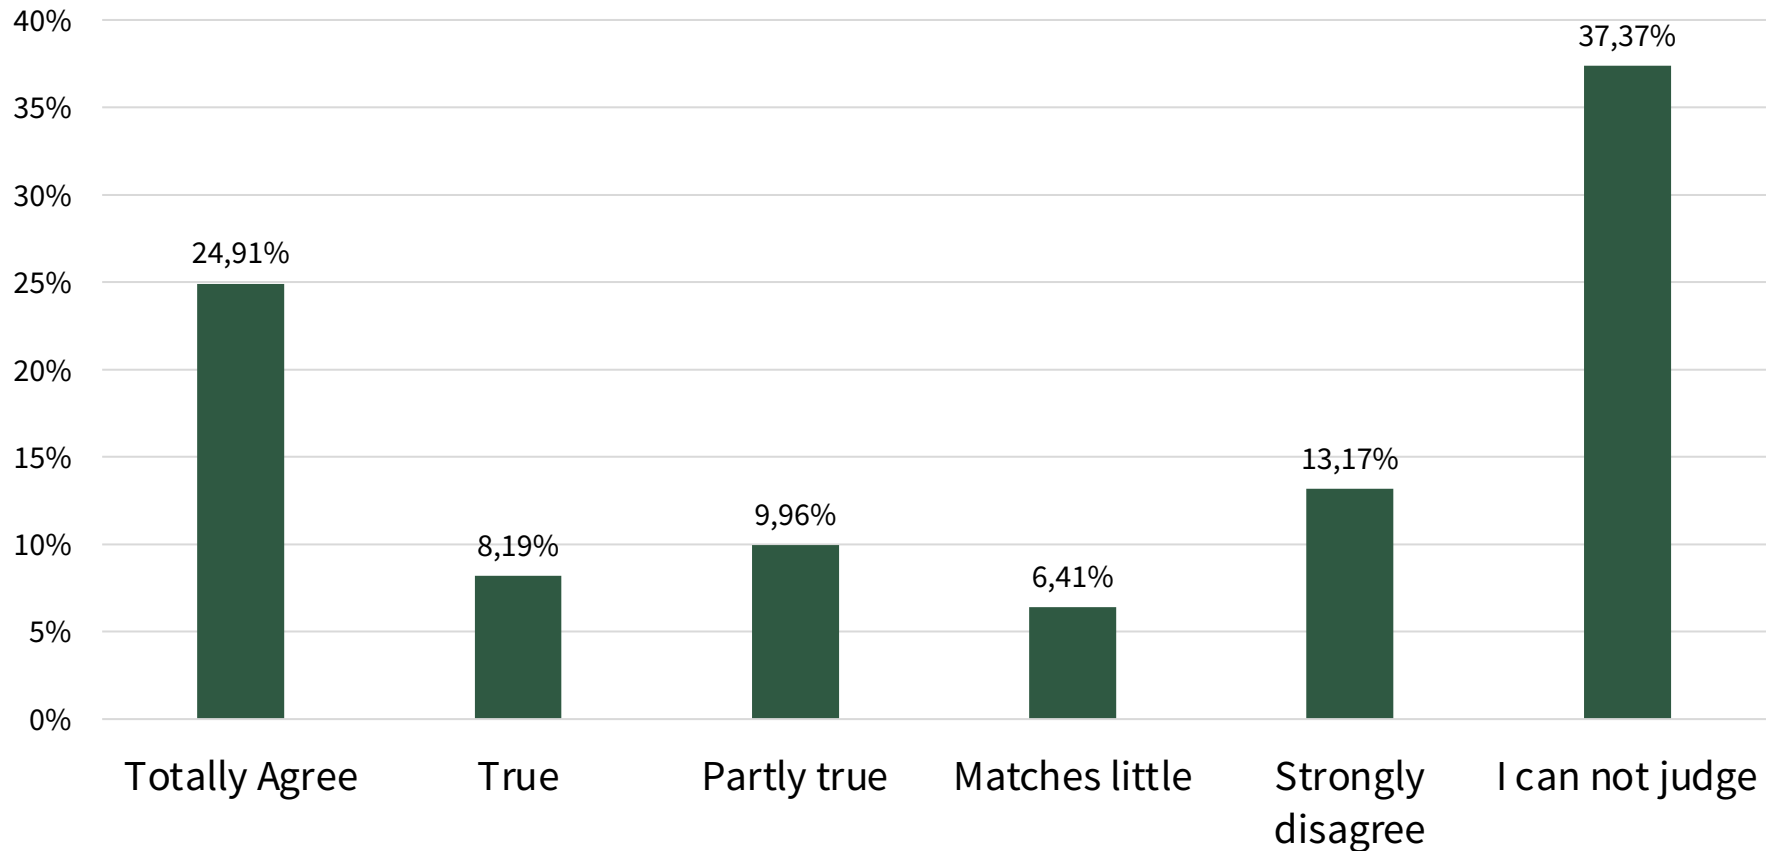

I turn off the light after leaving the room.

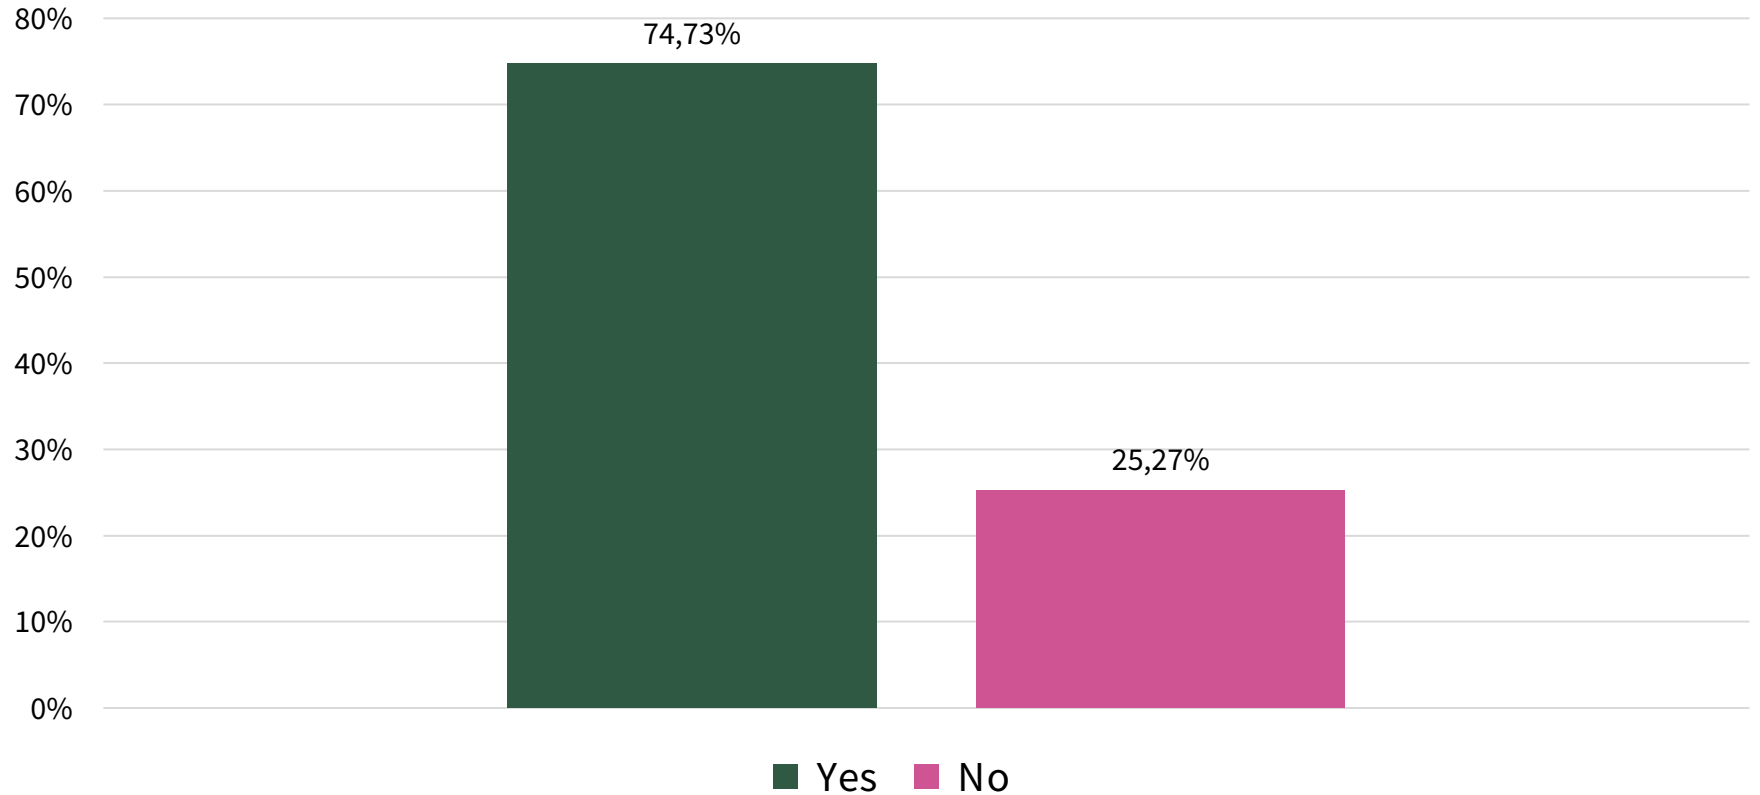

I shut down the computer in the evening instead of leaving it on standby.

For employees: I use the disconnectable power strips and disconnect the (office) devices from the circuit.

For employees: In my office there are connectable power strips.

Comments on heat:

(selection of the most frequent answers)

House 2: Windows only tiltable, no shock ventilation possible

Heaters partly not manually adjustable (House 5)

Poor air quality in overcrowded lecture halls at forest campus

Heaters continue to run when PC pools are ventilated

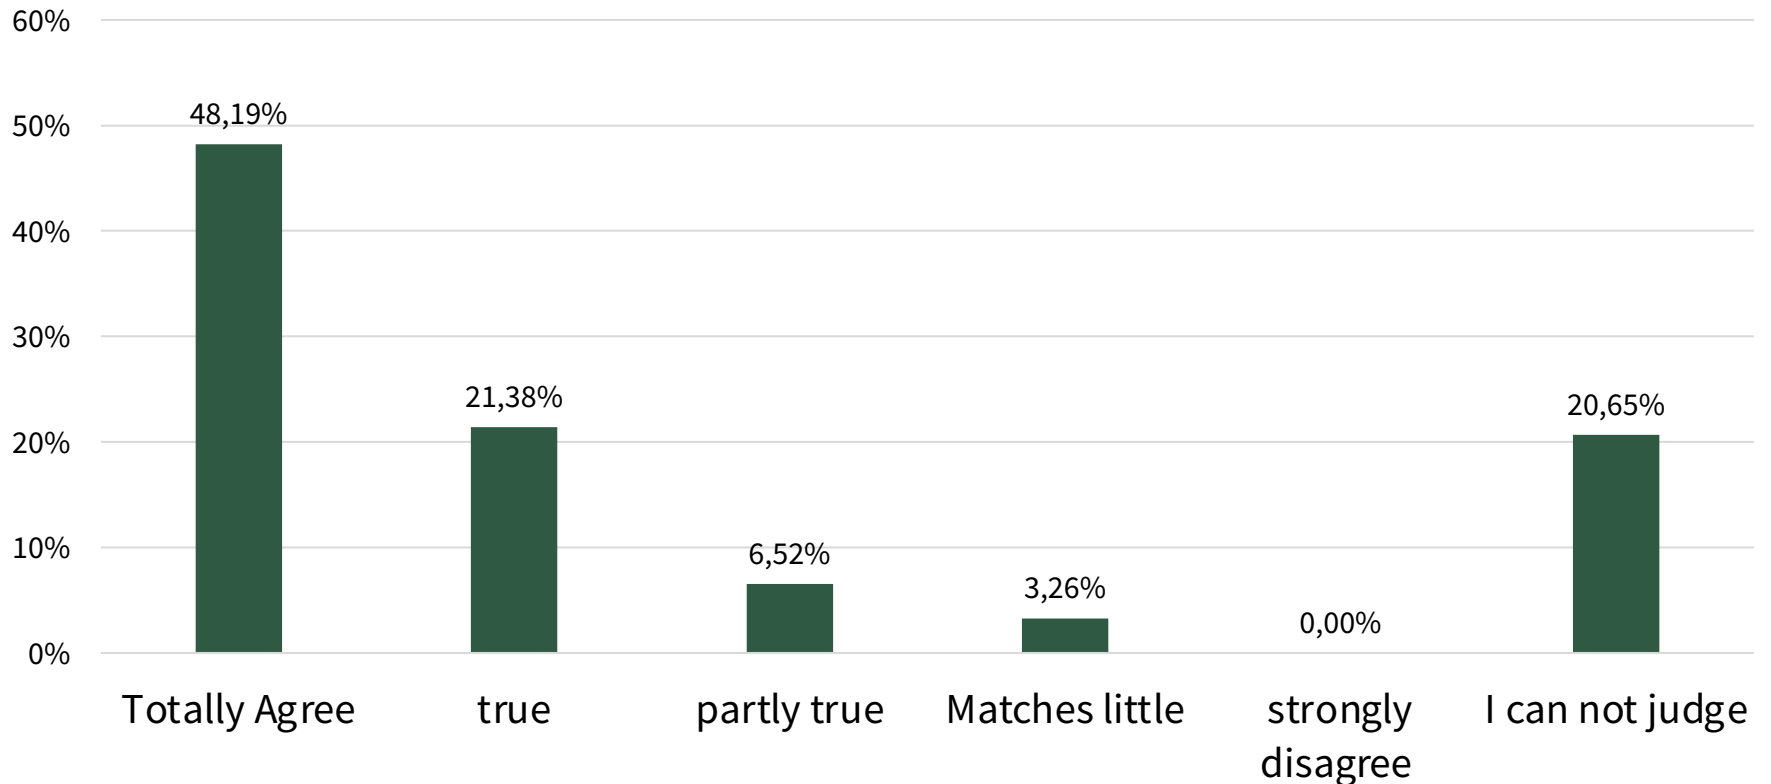

Poor regulation of heating in House 10

General winter too cold, summer too warm

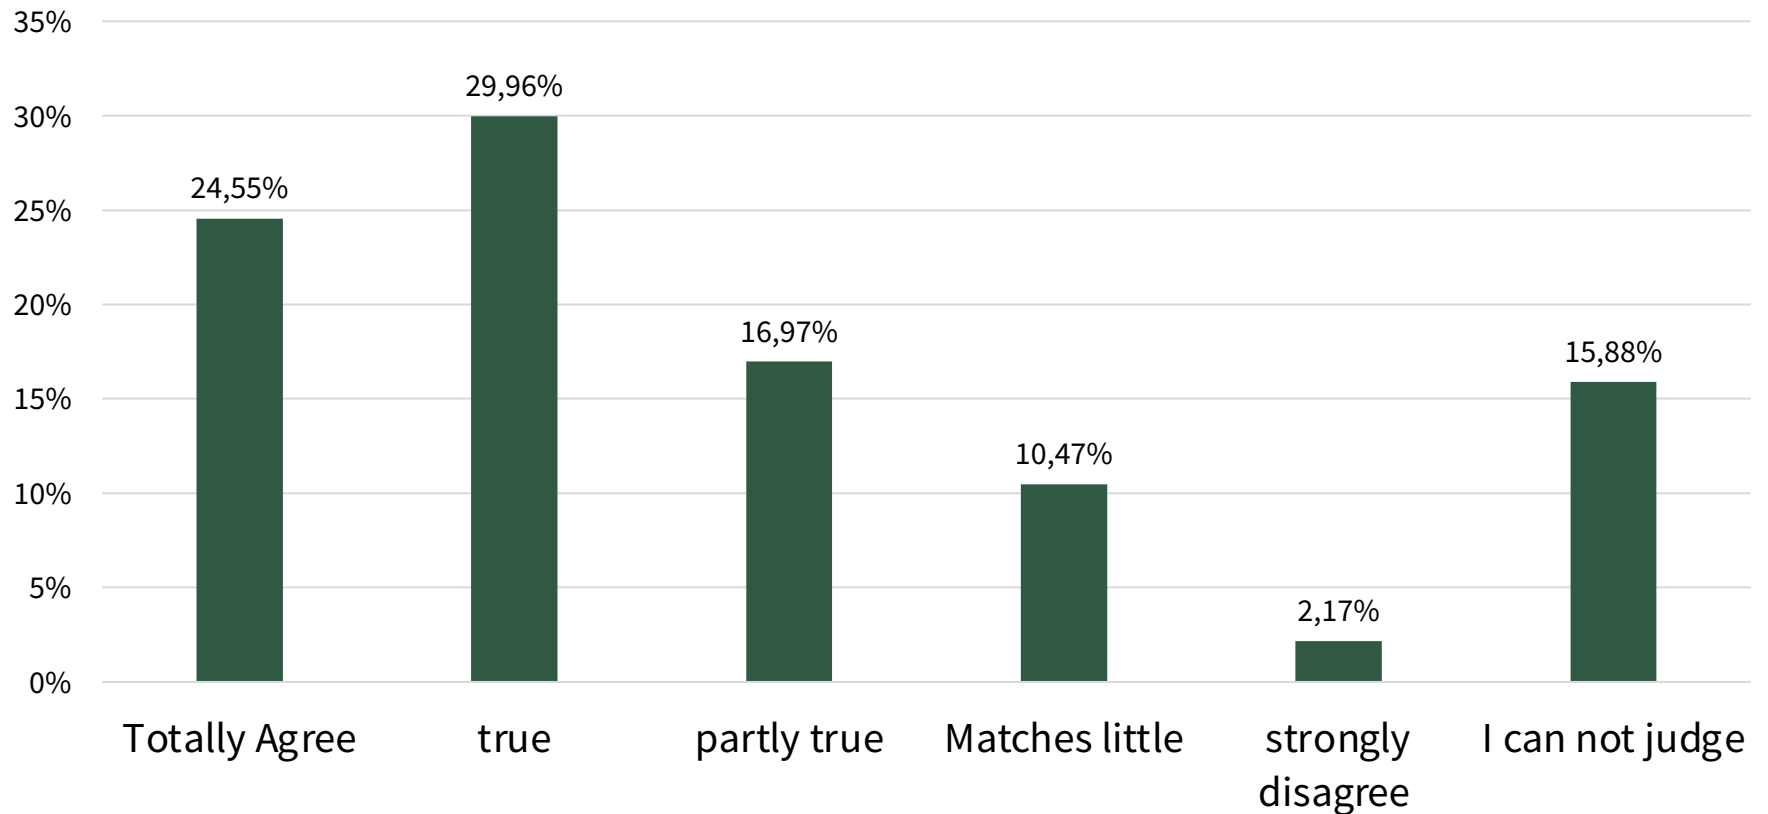

5. Use of energy (heat):

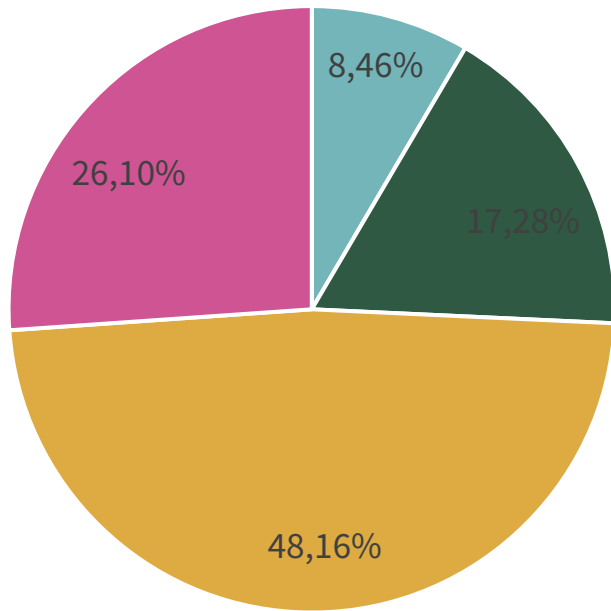

In my office / auditorium, the windows can be closed.

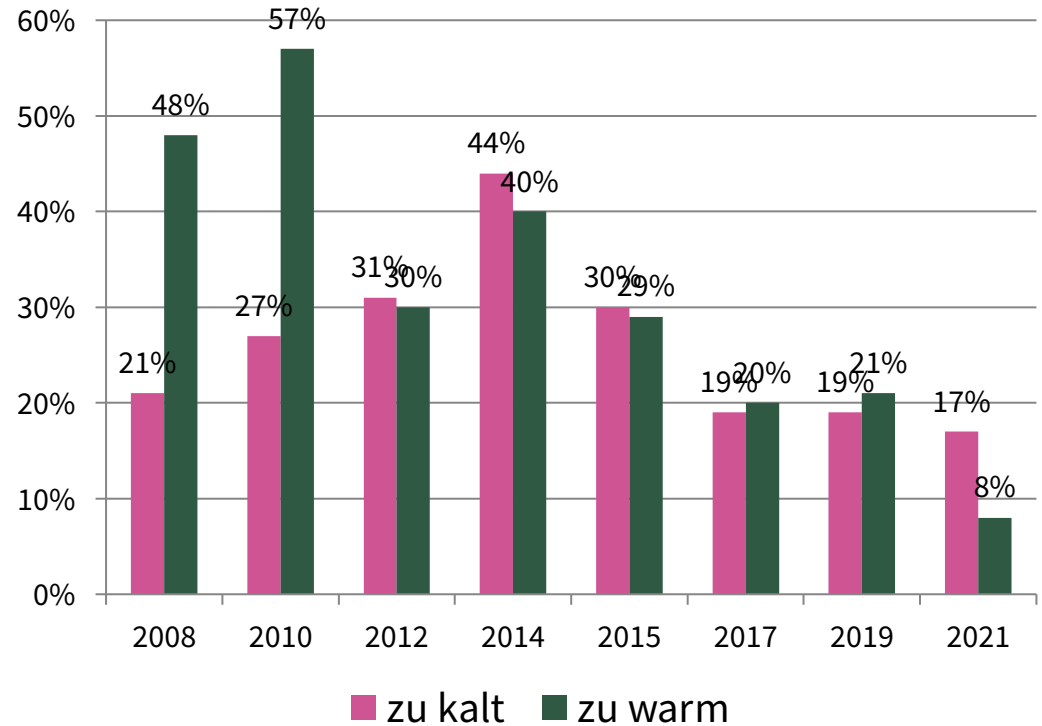

I find the room temperature in my lecture room / office mostly adequate.

In my lecture hall / office it is usually too cold.

- too warm
- adequate
- too cold
- i can not judge

Comments on occupational safety:

(selection of the most frequent answers)

Offices are partly very brightly heard

Very bad air quality in lecture halls in house 11

Offices on the 3rd floor of house 11 get very warm in summer

Offices on the side of Friedrich Ebers Straße heavily polluted by noise

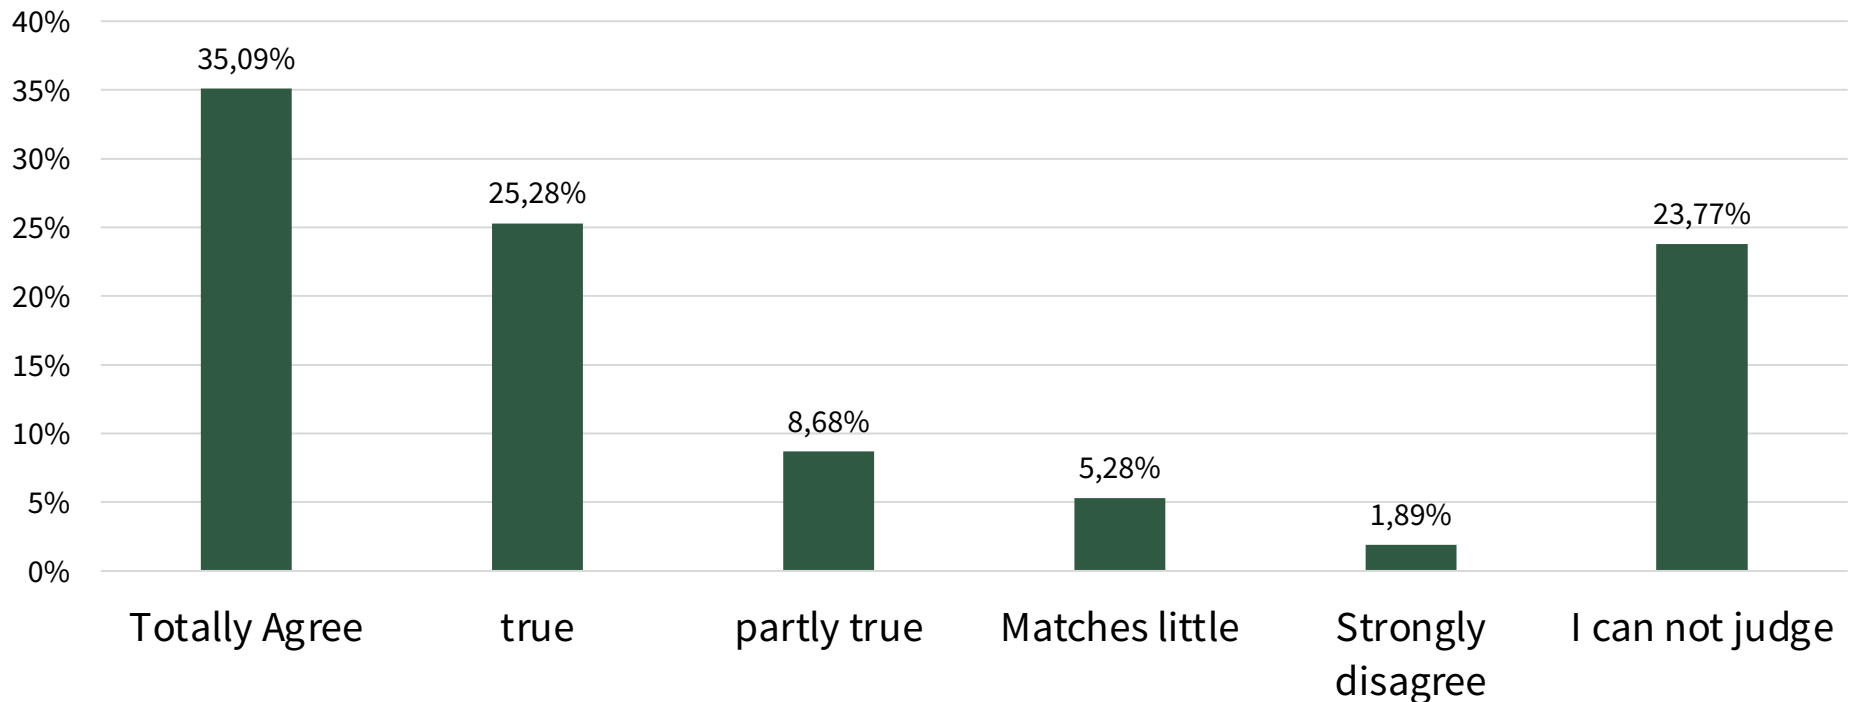

House 5 PC Pool: computers crash, screens go out, bad air

House 2: Poor air quality, partly very warm due to sun

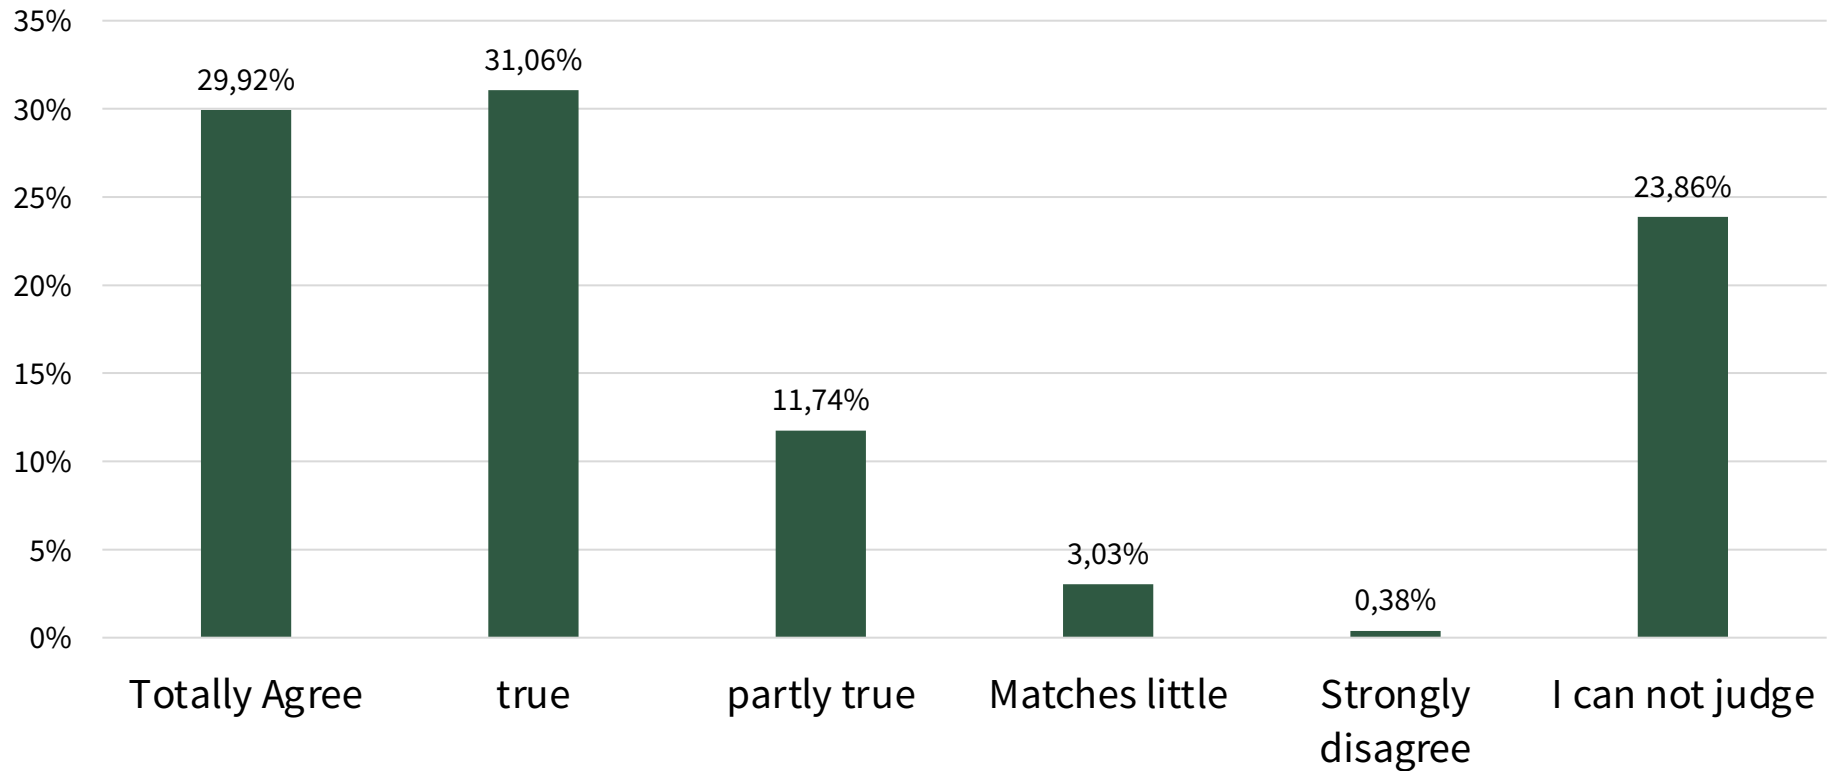

6. Environmental safety and emissions:

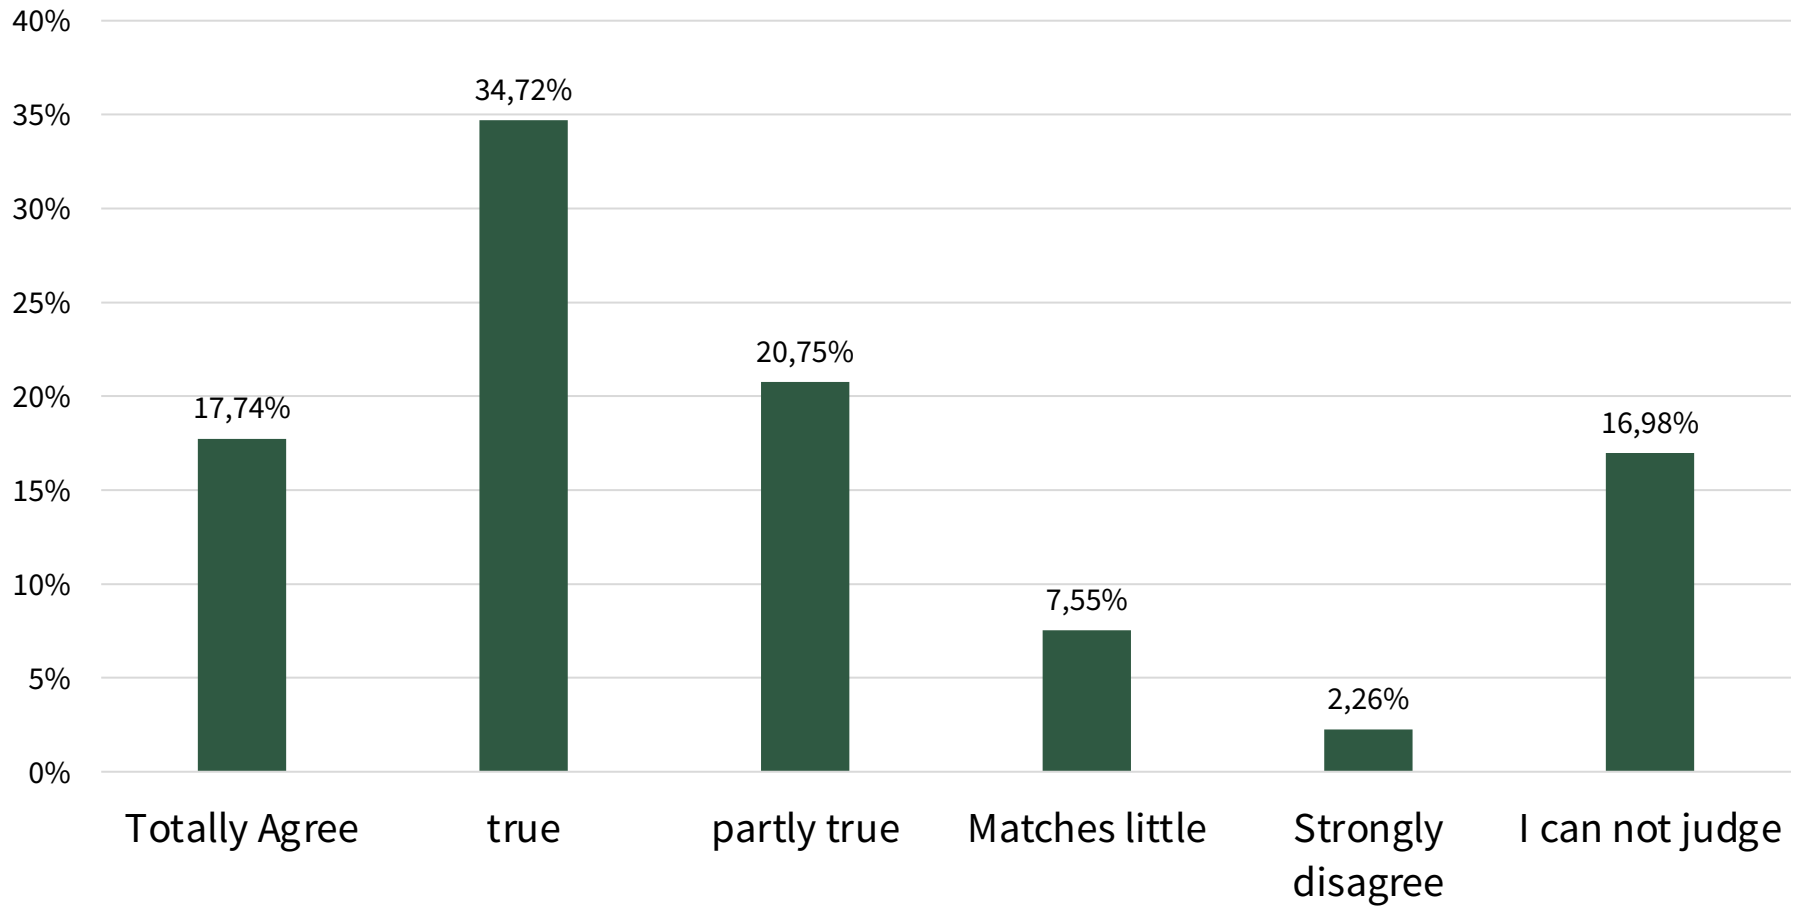

In my lecture hall / office there are no tripping hazards, no open cable shafts, no shaky shelves.

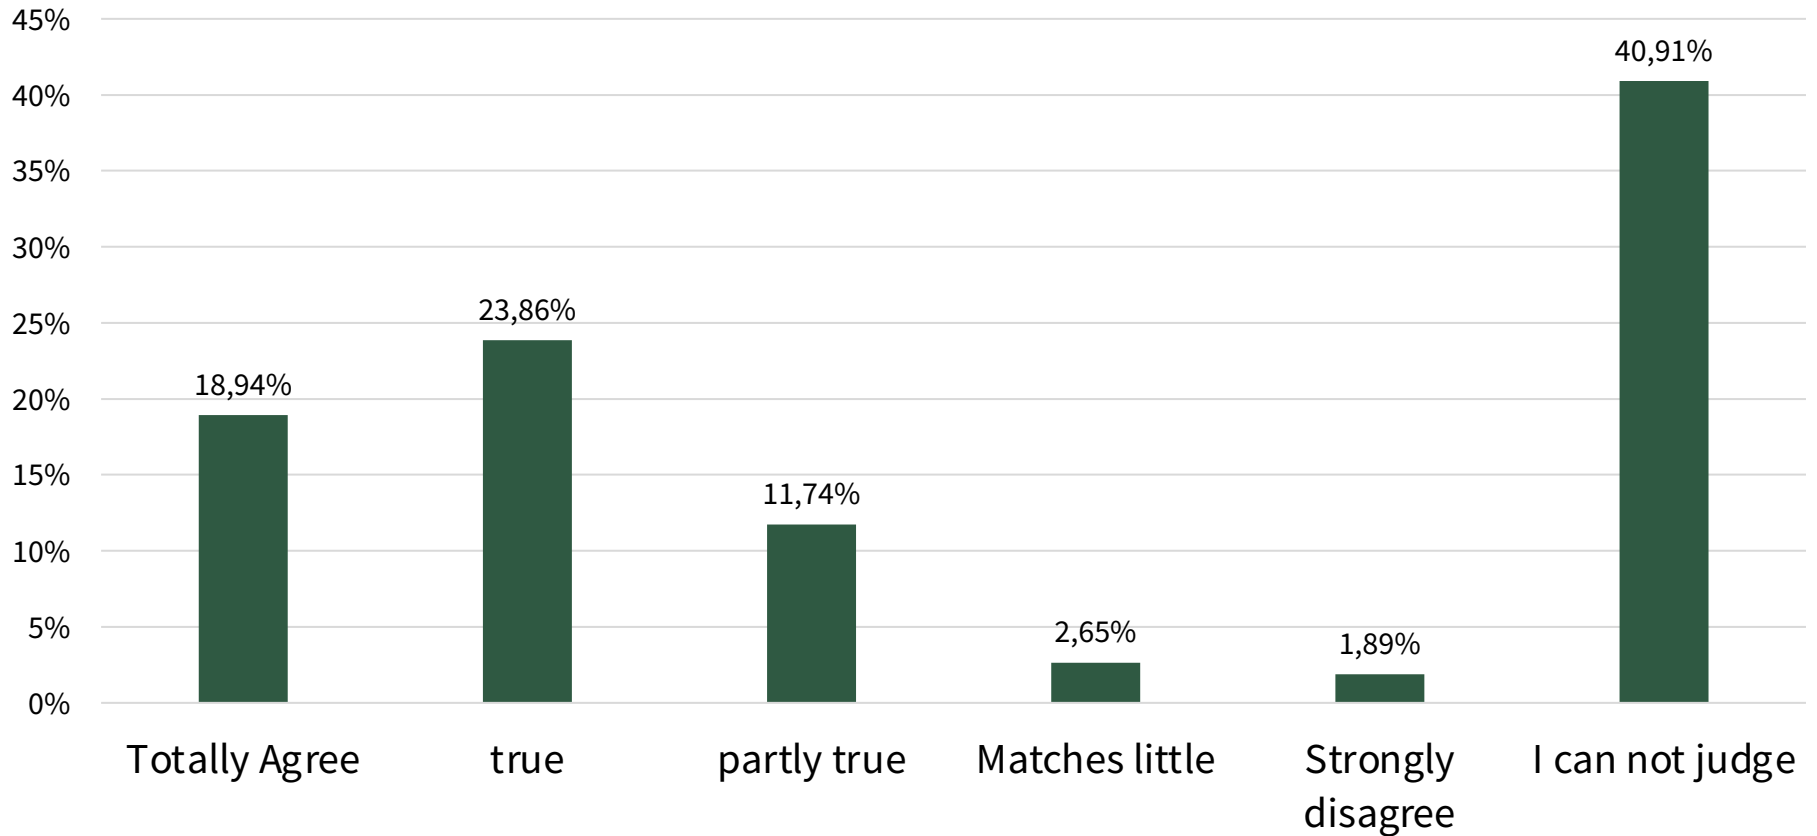

In my lecture hall / office all technical devices are in good condition. Escape and rescue routes are signposted in my work / study area.

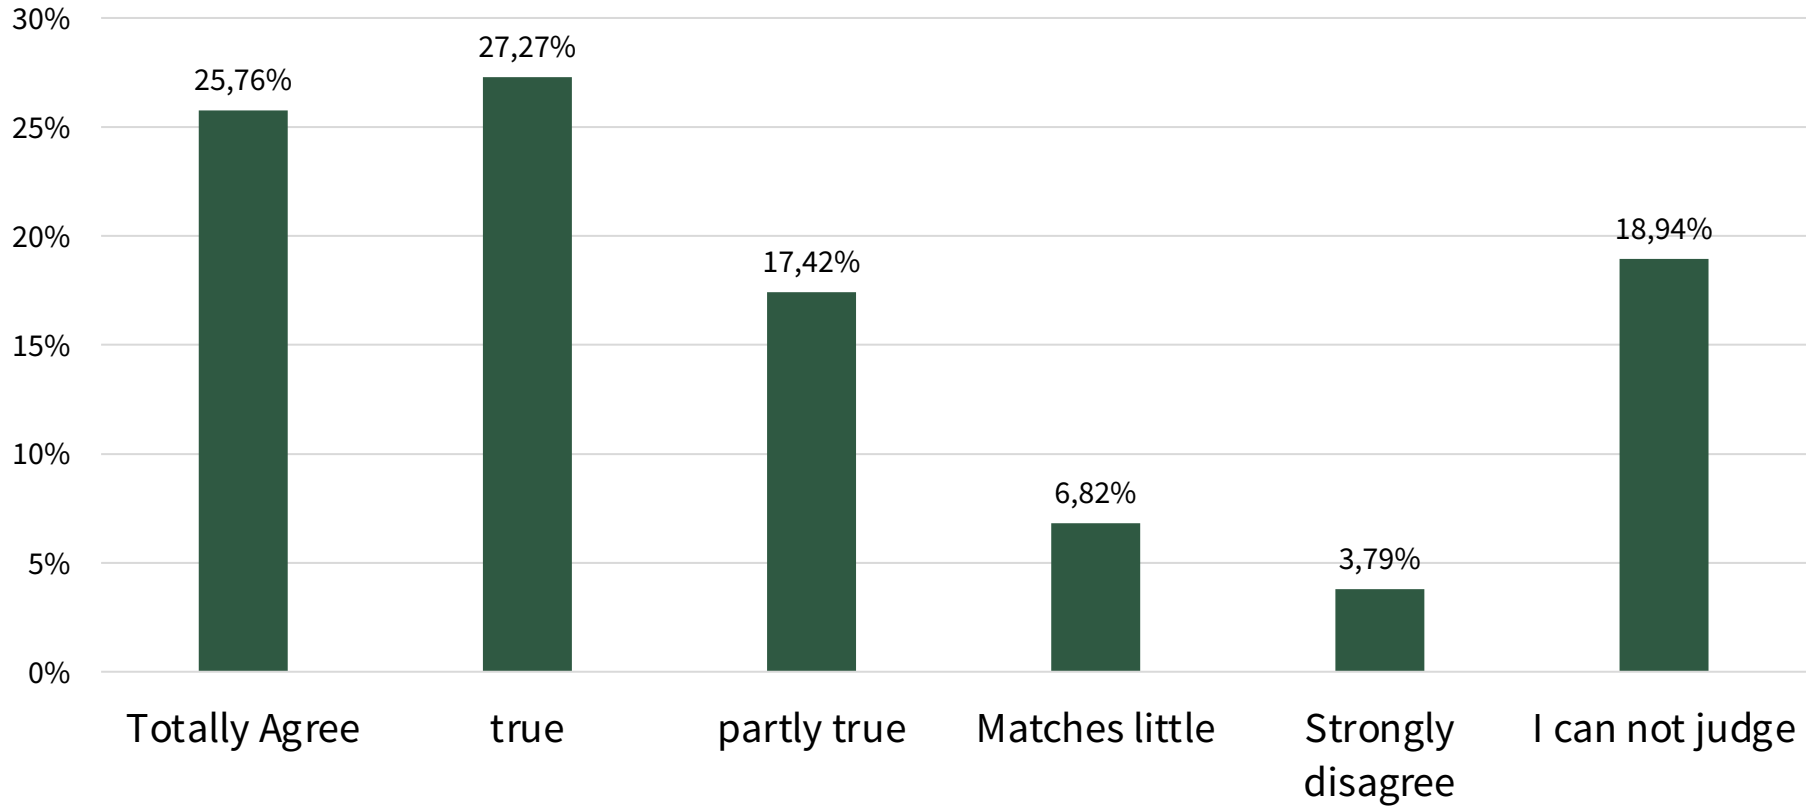

The air quality in my auditorium / office is good.

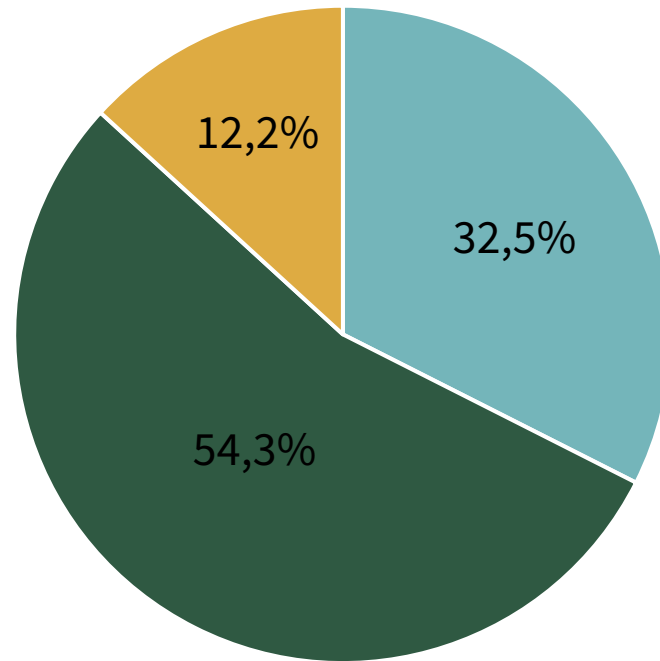

The use of the (office) equipment does not lead to the deterioration of the air quality.

In my lecture hall / office is no disturbing noise, for example, from neighboring rooms to hear.

I know where a first aid kit at HNEE is for emergencies.

■ Yes ■ No ■ i can not judge

Comments on the topic of mobility:

(selection of the most frequent answers)

Insufficient bus connection (e.g. from the dormitory, to the forest campus)

Covered bike racks would be desirable

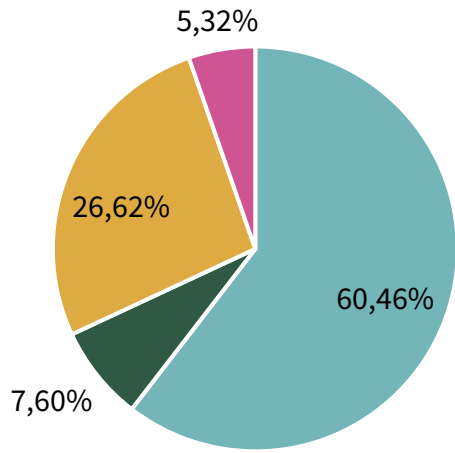

Shower facilities would motivate more cycling

Charging infrastructure for e-bikes at the campuses is desired

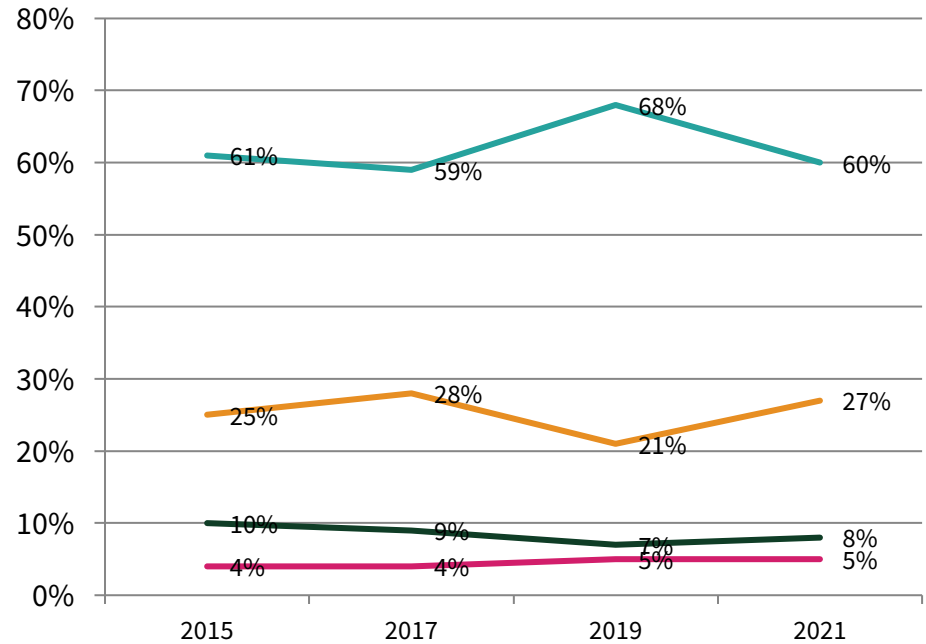

7. Mobility:

a) Where do you normally come from to study / work for the HNEE?

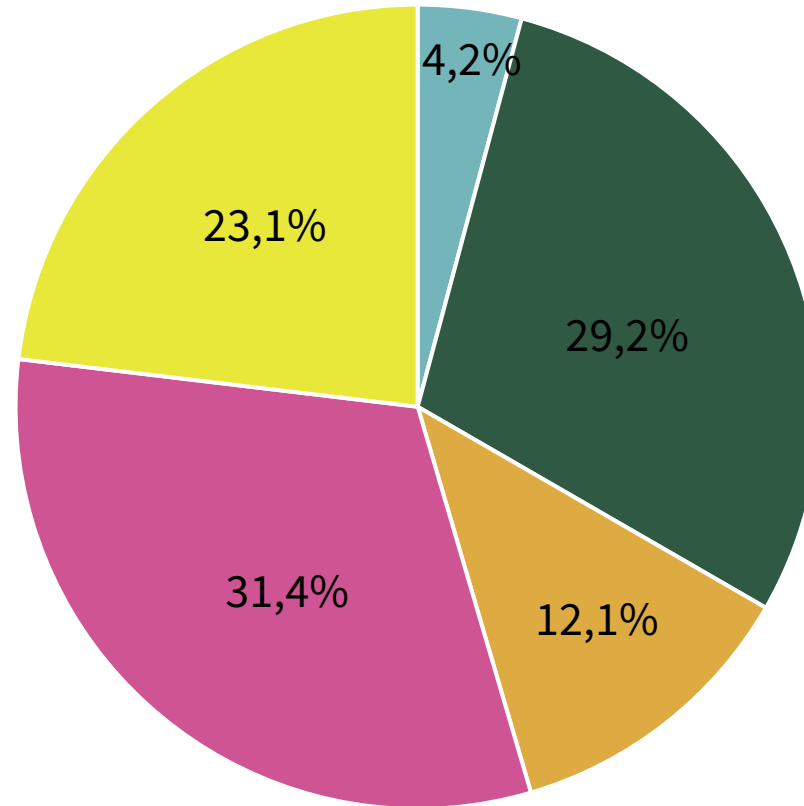

- Eberswalde / Finow
- Eberswalder surroundings (up to 30km)
- Berlin
- Other

- Eberswalde/Finow
- Eberswalder Umland (bis 30 km)
- Berlin
- Sonstgies

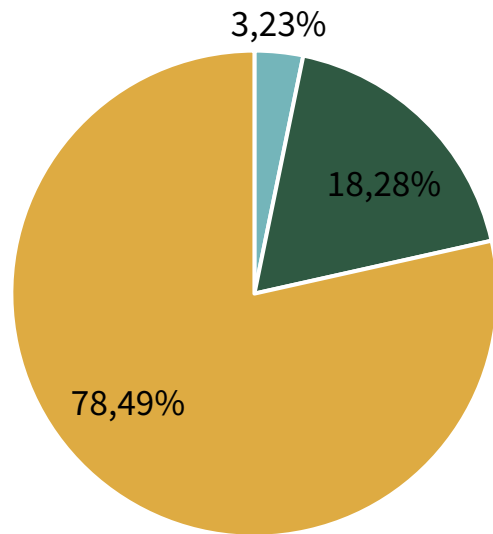

b) With which means of transport do you usually come to study / work at HNEE?

■ bus ■ train ■ automobile ■ bicycle ■ on foot

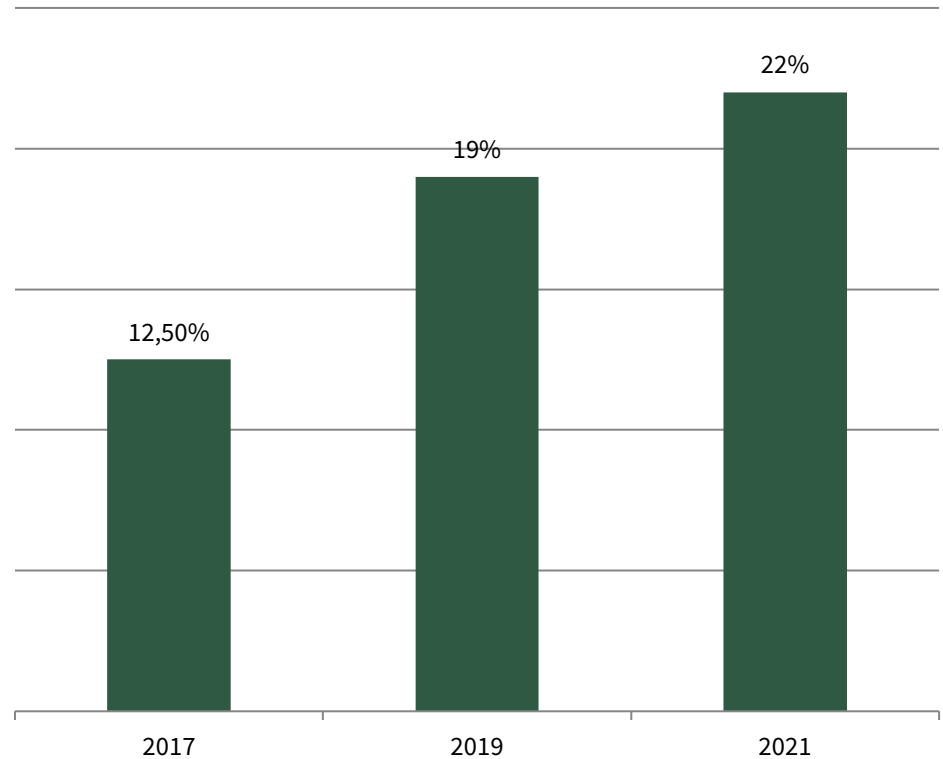

For employees: I have already used one of the university's own bicycles.

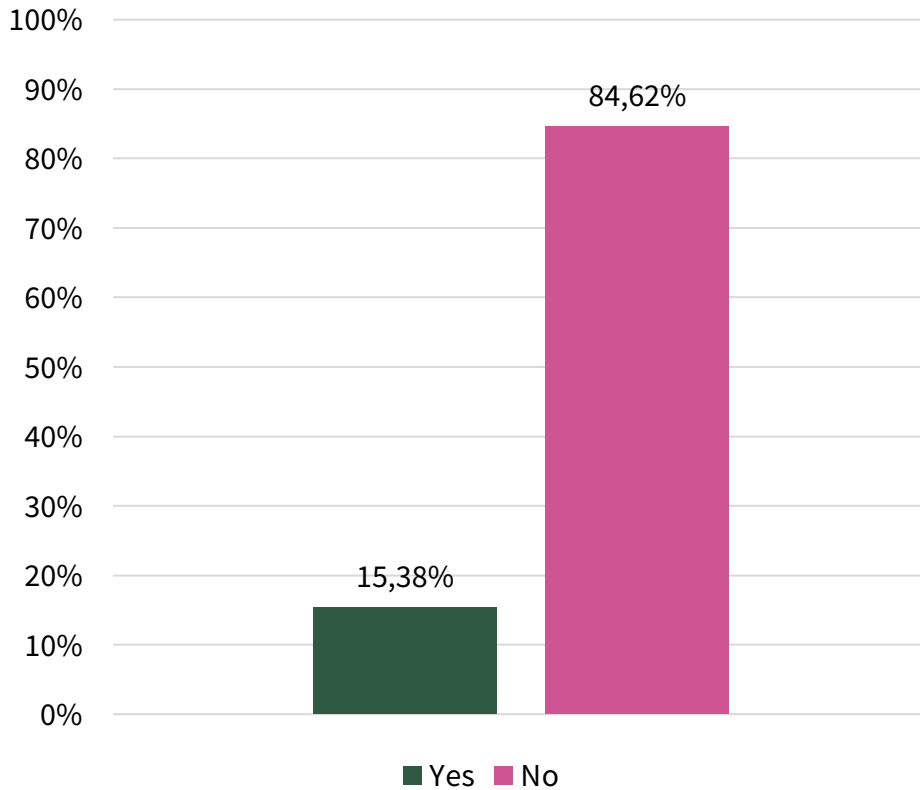

- Yes, at the forest campus.
- Yes, at the city campus.
- No

Usage of university bicycles

Do you use our electric car sharing vehicle at the city campus for business purposes if required?

Justifications:

No need

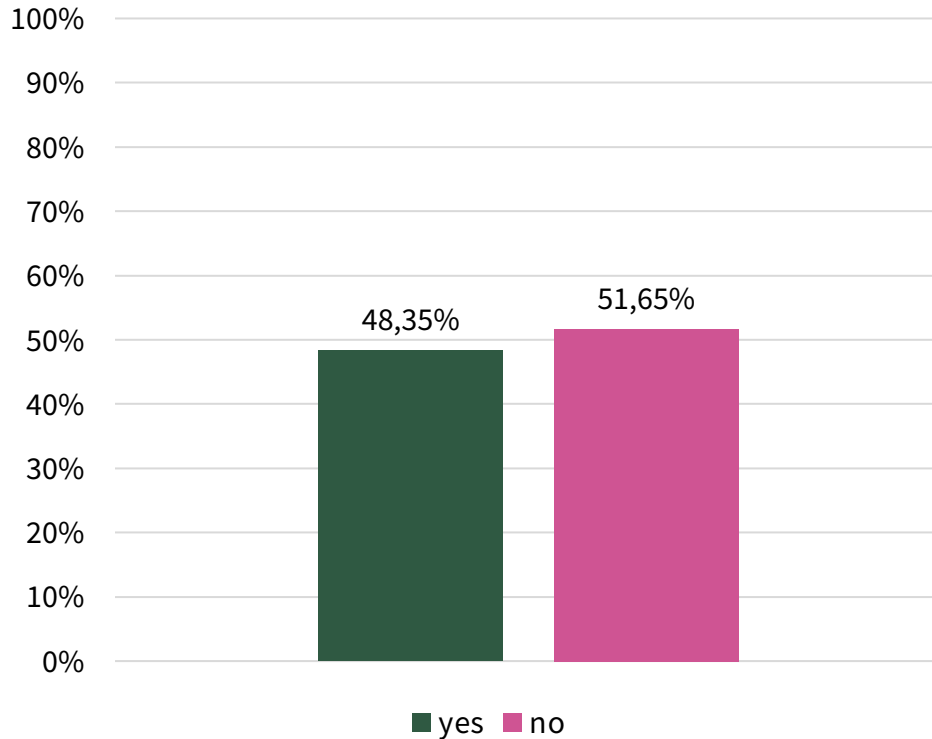

Complicated registration, long planning

Too short range and not suitable for off-road use

Lack of knowledge about how it can be used

On 28.4.2021 the chancellor informed about the possible use of a job ticket. Are you interested in the job ticket?

Justifications:

No need (bike use, child transportation, etc.).

Poor public transport connection to university

Does not provide financial relief

Not available in temporary contract

More information is requested on these topics:

(Selection of the most frequent answers)

Rainwater harvesting at HNEE

Composting facilities, soil formation High-quality rental bicycles

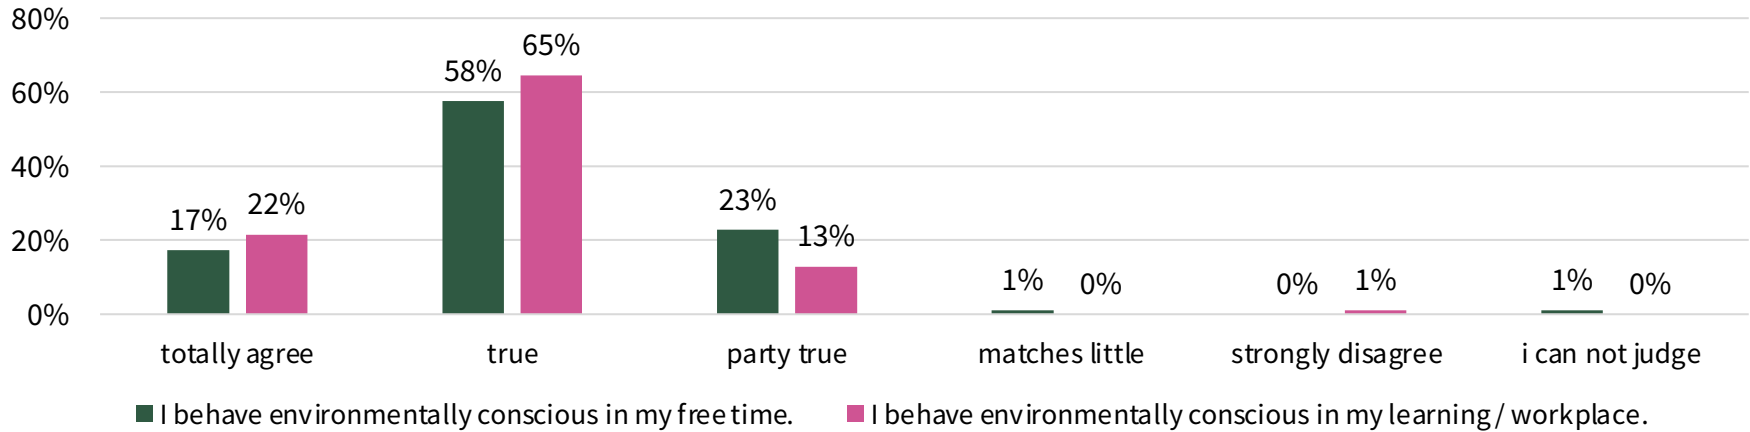

Origin of electricity and heat

Recycling of batteries and printer cartridges Fruit and fruit plants on the campuses

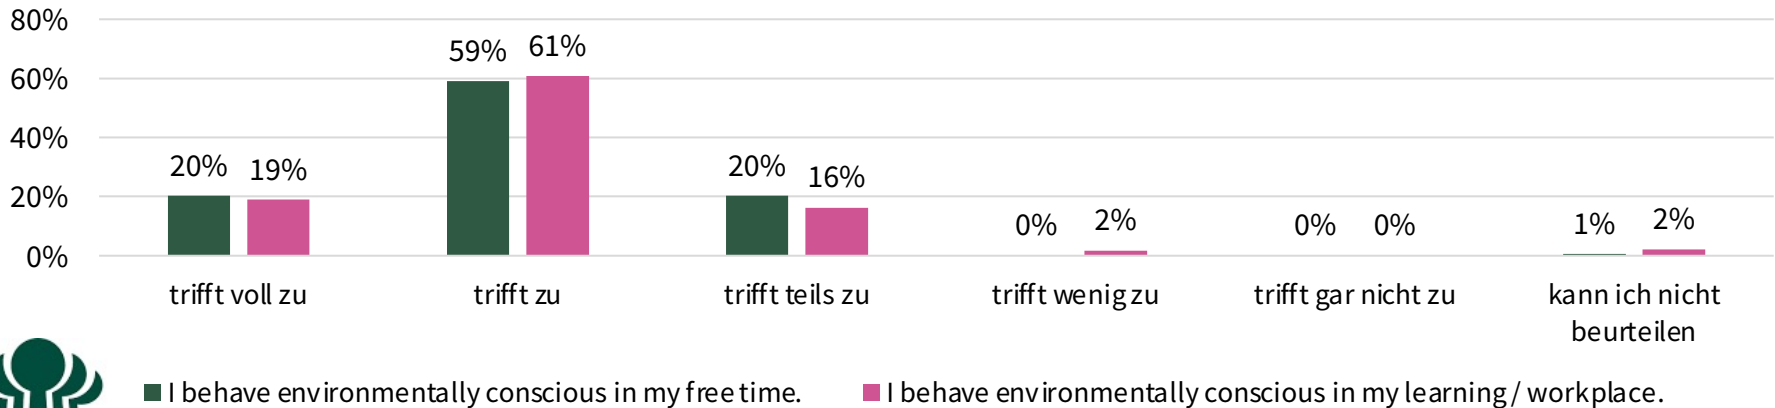

8. Personal environmental awareness

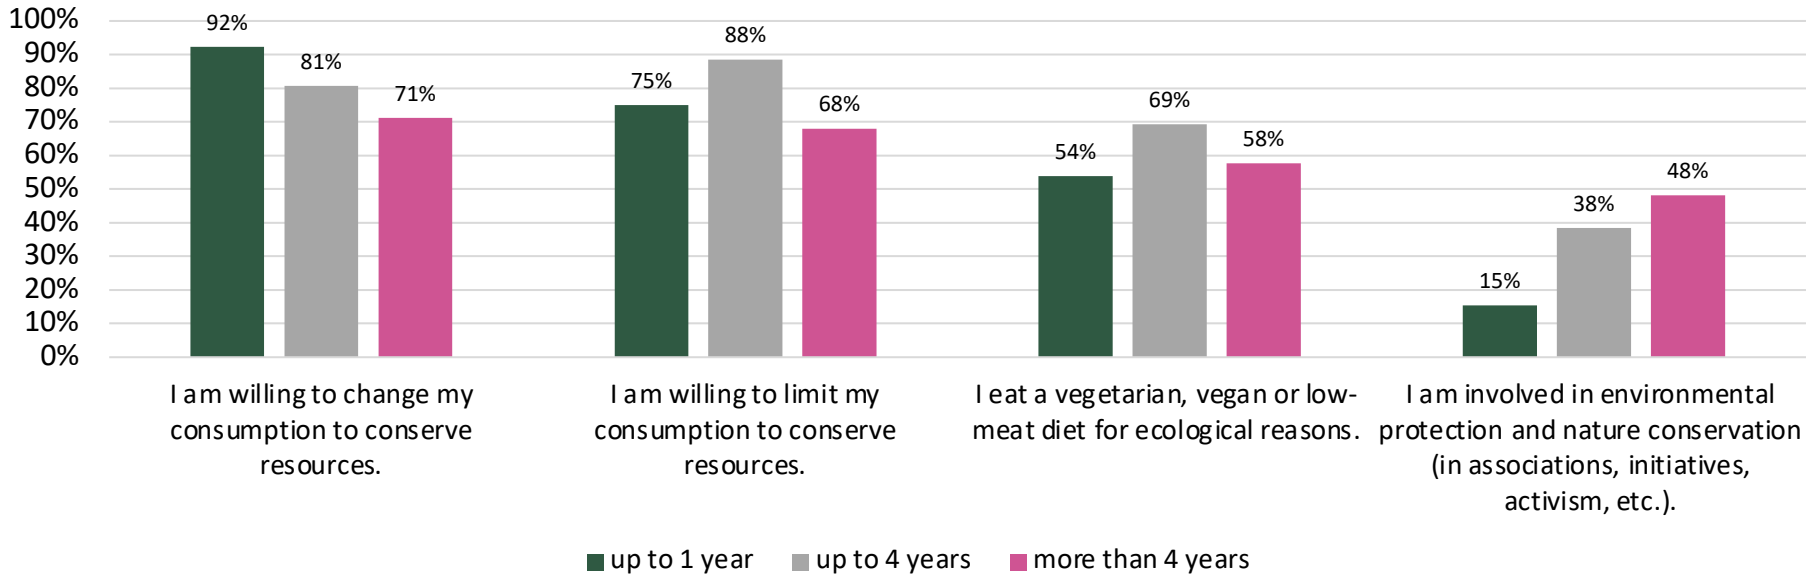

Employees

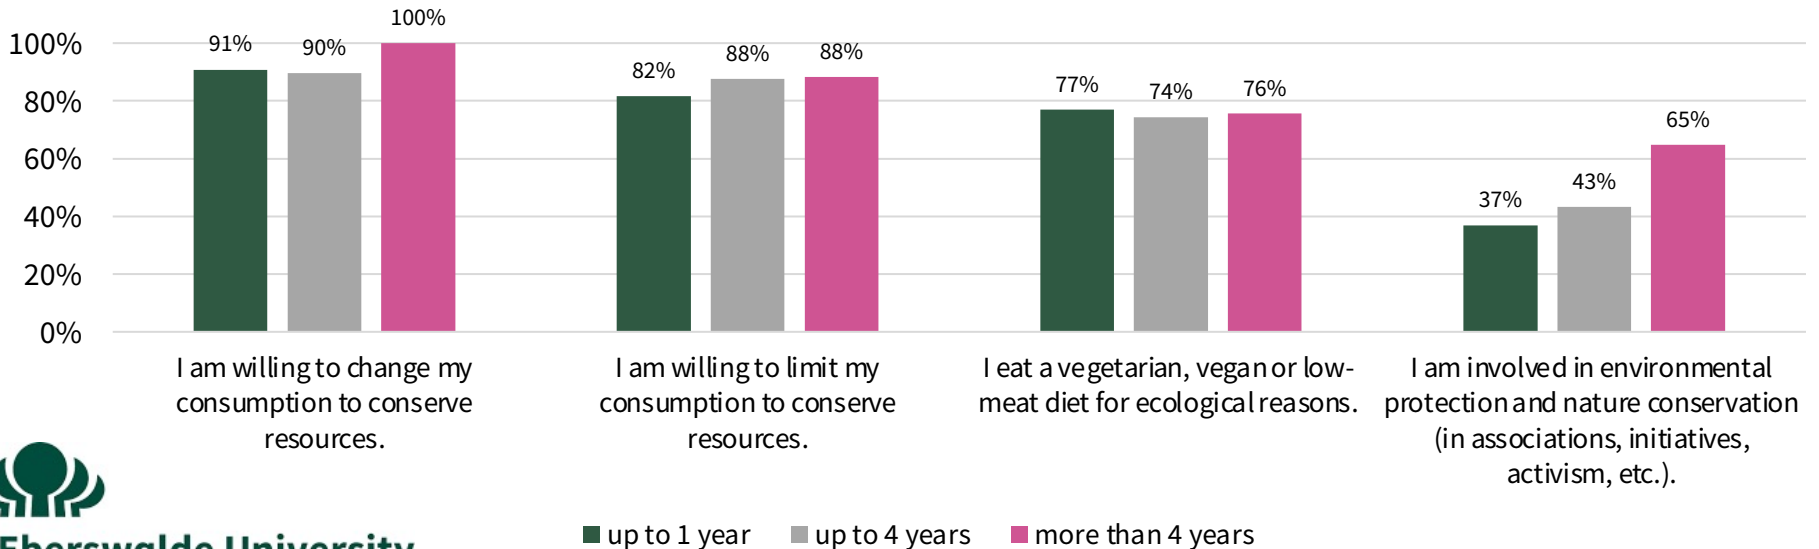

Students

Employees

Students

10. How did you hear about HNEE's environmental management?
